Orion Stand is used to protect any Orion light guard against shock and collision. Orion Stand is made of an extruded aluminum column with a steel base. Orion Stand can also be used with the deviating mirrors Orion1 Mirror.

**Easy adjustment**

The base is made of two plates. Both their inclination and their angular position can be adjusted. A spirit level facilitates the adjustment. Equipped with springs, Orion Stand Plate can be used to absorb vibrations and compensate uneven floor surfaces. Orion Stand Plate is available as an accessory.

**How to order**

The Orion protective stands are available in different lengths and compatible with all the Orion light guards. A mounting kit is necessary to mount the light guard in the stand. Which kit depends on the model of light guard and its length. See the ordering information in order to choose the right kit.
