Enhancements

New Smart Sensor user notification includes EULA and Privacy policy

The new user joining the Smart Sensor platform via the mobile app receives the “ABB Ability™ Smart Sensor – You have been added to a user group” e-mail notification. The e-mail also includes the End-User License Agreement (EULA) as an attachment and a link to the Privacy policy.

The documents are made easily available to user so that, by logging in and using the Smart Sensor platform, the user confirms to agree with the terms of these documents.

Subscription type renamed

When the validity of an active subscription ends, the subscription type displays as ‘Freemium’ instead of “No subscription”. See the below sample screen from Smart Sensor portal.

The screenshot shows the Smart Sensor portal interface. At the top, there are dropdown menus for 'marketplacetesting', 'Default Asset Group', and 'DF7_...'. Below this, there are icons for a sensor and a document, followed by the asset name 'DF7_...' and location 'Bangalore', with an 'Add tag +' button. A navigation bar contains 'Event log', 'Operational parameters', 'Asset properties', and 'Sensor properties'. The main content area is titled 'Sensor details' and contains a table of sensor information. The 'Subscription type' row is highlighted with a red border and shows the value 'Freemium'.

Sensor details		
Sensor identifier	C20000DF7	Measurement
Sensor type	Smart Sensor High Performance	Sensor to ga
Firmware version	5.8.4	Battery mod
Hardware revision	A	
Subscription type	Freemium	
Bluetooth MAC	50:31:AD:03:15:C6	
Gateway MAC	CC:1B:E0:E2:09:C4	
Gateway manufacturer type	Cassia X1000	
Gateway online status	Online
