Measurement made easy

—
TB84 transmitter series
4-wire transmitters

Introduction

This document provides an overview of the TB84 transmitter series life-cycle phases detailing ABB's availability to support this product now and in the foreseeable future.

The TB84 transmitter series covers the following products:

Part number	Description
TB84PH	pH/ORP/plon transmitter
TB84TE	2-electrode conductivity transmitter
TB84EC	4-electrode conductivity transmitter
TB84TC	Toroidal conductivity transmitter

Product life-cycle

ABB life-cycle policy for Continuous Water Analyzers

ABB’s range of [Water Analyzers](#) are designed for continuous evolution, and each of the individual products go through a defined life-cycle process.

Once the product has been removed from Active sale we will continue to support the product with spares for up to 10 years through the Classic and Limited life-cycle phase.

Where possible we will endeavor to secure stock at the point of when the product has been removed from Active sale to support the installed base. However, it is important to note that during this period certain spares may no longer be able to be sourced due to component obsolescence issues outside of ABB control.
