

Crystal Springs, Mississippi

Facility Overview

Location
101 Kuhlman Drive
Crystal Springs, MS
39059

Operational since
1954

Number of employees
320+

Offering
Small power transformers

What we do in Crystal Springs

Design and manufacture small power transformers (5 - 45 MVA, up to 161kV) for the electric grid. These transformers adjust and stabilize electricity as it flows from generating facilities to substations in neighborhoods across the country; ensuring an efficient, reliable power supply for millions of Americans and businesses.

Who we serve

Transformers built in Crystal Springs can be found in substations along electric transmission and

distribution grids as well as industrial facilities across the U.S. Used by electric utilities, manufacturing plants, and industrial facilities, our transformers help ensure a steady supply of reliable, low-cost electricity to power our economy.

ABB in the U.S.

ABB is a pioneering technology leader that works closely with utility, industry, transportation and infrastructure customers to write the future of industrial digitalization, increasing productivity and boosting efficiency.
