ABB Ability™ Ellipse® EAM software for the rail industry

Advanced maintenance, safety and performance management of assets

- Manages infrastructure, linear assets, rolling stock and workforce resources
- Tracks government grants and funding to ensure wise spending and regulations compliance
- Improves inspection management with access to vehicle and equipment checklists via mobile devices
- Specifically designed to assist with ISO 55000 compliance

“The primary impact of Ellipse was the tremendous increase in clarity and transparency in the requisition to check process: reconciliation of invoices to purchase orders, as well as data management and utilization.”

Australian State Transit Authority, East Coast

Maximize the performance of your rail operations

- Proven enterprise asset management (EAM) and enterprise resource planning (ERP) solution
- Able to be operational in 90 days with preconfigured best practices, processes and functionality for public transit
- Designed for managing the operations, assets, people and performance of public transit
- Enables condition-based rather than time-based maintenance management
