

## DSE201, DSE201 M Compact design with enhanced protection

# Ultimate safety DSE201 and DSE201 M: the highest level of reliability

The 1P+N electronic residual current circuit-breakers with overcurrent protection (RCBOs) of DSE201 and DSE201 M series offer a breaking capacity of 6 kA and 10 kA respectively, and meet the demand for devices that fully protect modern installations against short-circuit currents, overloads, earth fault currents and indirect contacts, providing additional protection against direct contacts (30 mA versions).

The 1P+N electronic RCBOs share the same profile of the System pro M compact® range of modular products, offering a smart retrofit solution for space constrained applications in residential, commercial and industrial environments.

Electronic RCBOs can be installed in countries where the use of 1P+N RCBO with functional earth (FE) is consolidated. Functional earth guarantees the highest level of safety. In case of loss of the neutral loop, the electronic trip unit is supplied by the voltage between phase and earth: even if only one phase is available, the RCD trips in case of leakage current.

# The module for total safety

## DSE201 6kA and DSE201 M 10kA: complete protection in one module width

The electronic RCBOs series is perfectly integrated with the System Pro M compact line for modular products, synonymous of ABB quality around the world.

With the same width as standard MCBs, these electronic RCBOs are fully integrated with ABB's range of Consumer Units and Distribution Boards. Suitable to work from -25 °C to +55 °C ambient temperatures, the DSE201 and DSE201 M series of 1P+N electronic RCBOs cover all applications, offering a complete protection of single-phase systems from short circuit, overload and residual current conditions.

With breaking capacity of 6 and 10kA and rated current from 6 to 50A, the series is suitable for installation in residential, light commercial, commercial and industrial applications.

Installation is made simpler by reduced heights compared to the previous series. The availability of two slots of different dimensions at the bottom side allows the use of both cables and busbars. Installation and removal operations from busbar and cabling are very easy and can be done with a standard insulated screwdriver. Line side terminals are fail-safe type to avoid improper connection, while double clips ensure a secure mounting of the devices in any type of consumer unit or distribution board.

The possibility to lock the toggle in ON/OFF positions with a padlock avoids unwanted manipulation of the lines.

The DSE201 M series is equipped with an earth fault indicator to detect any earth fault trip and also with a contact position indicator window to clearly identify the contacts status.

DSE201 6kA

DSE201 M 10kA

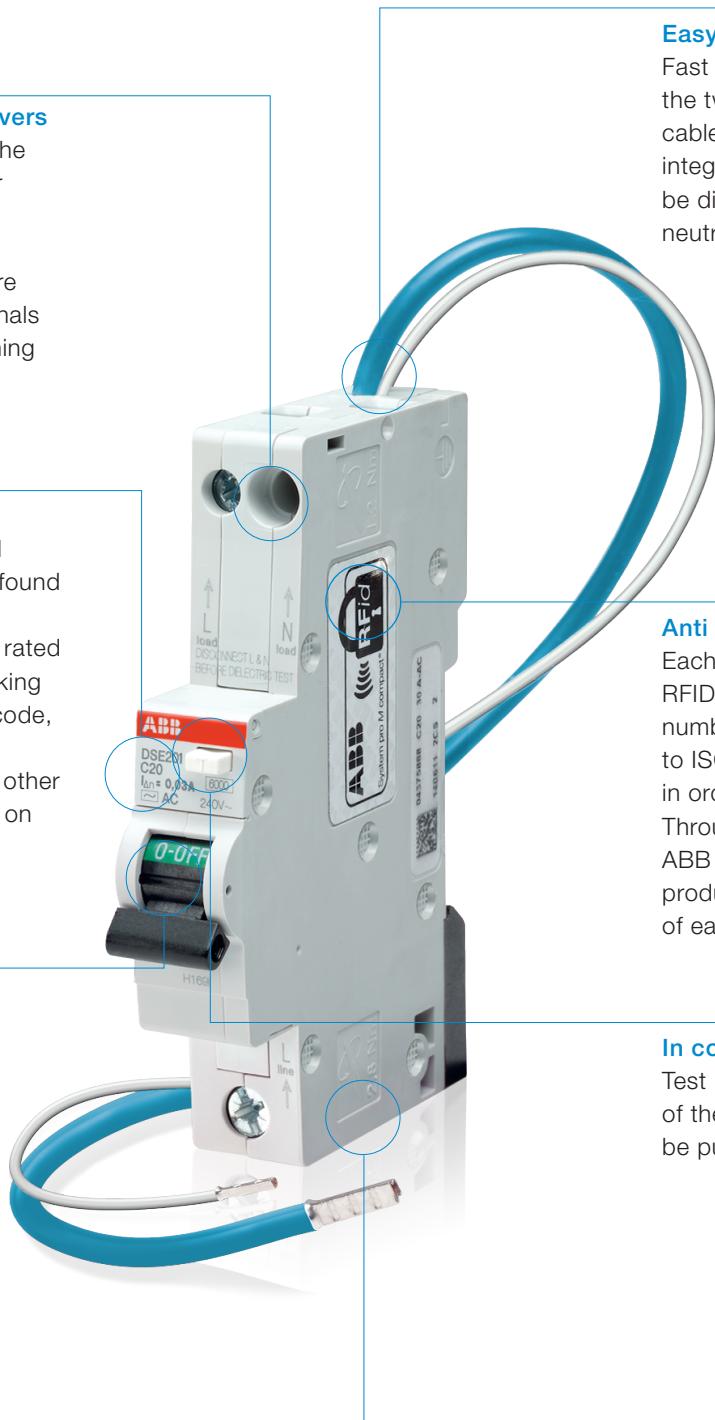

# DSE201, the value of quality Made with attention to details

## Space for insulated screwdrivers

The larger neutral hole allows the use of an insulated screwdriver to tighten the screw of neutral terminals, ensuring maximum operation safety. All versions are equipped with cage type terminals (16mm<sup>2</sup> load side), with tightening torque of 1.2 Nm.

## Product coding

All the necessary technical and installation information can be found directly on the device. Product range, tripping characteristics, rated currents, sensitivity, type, breaking capacity, rated voltage, order code, EAN code, electrical scheme, reference standards and many other specifications are laser printed on the front and side of units.

## Easy to install

Fast installation is supported by the two flying leads for neutral cable and functional earth, each integrated in the device, which can be directly connected to the main neutral bar and main earth bar.

## Anti counterfeiting

Each DSE201 is equipped with a RFID tag containing a unique serial number assigned by ABB according to ISO/IEC FCD 15693-3 standard in order to authenticate the product. Through this unique serial number, ABB can easily identify counterfeited products and verify the authenticity of each single device.

## In control

Test button allows the regular check of the functionality of the device: to be pushed every six months.

## Reduced height

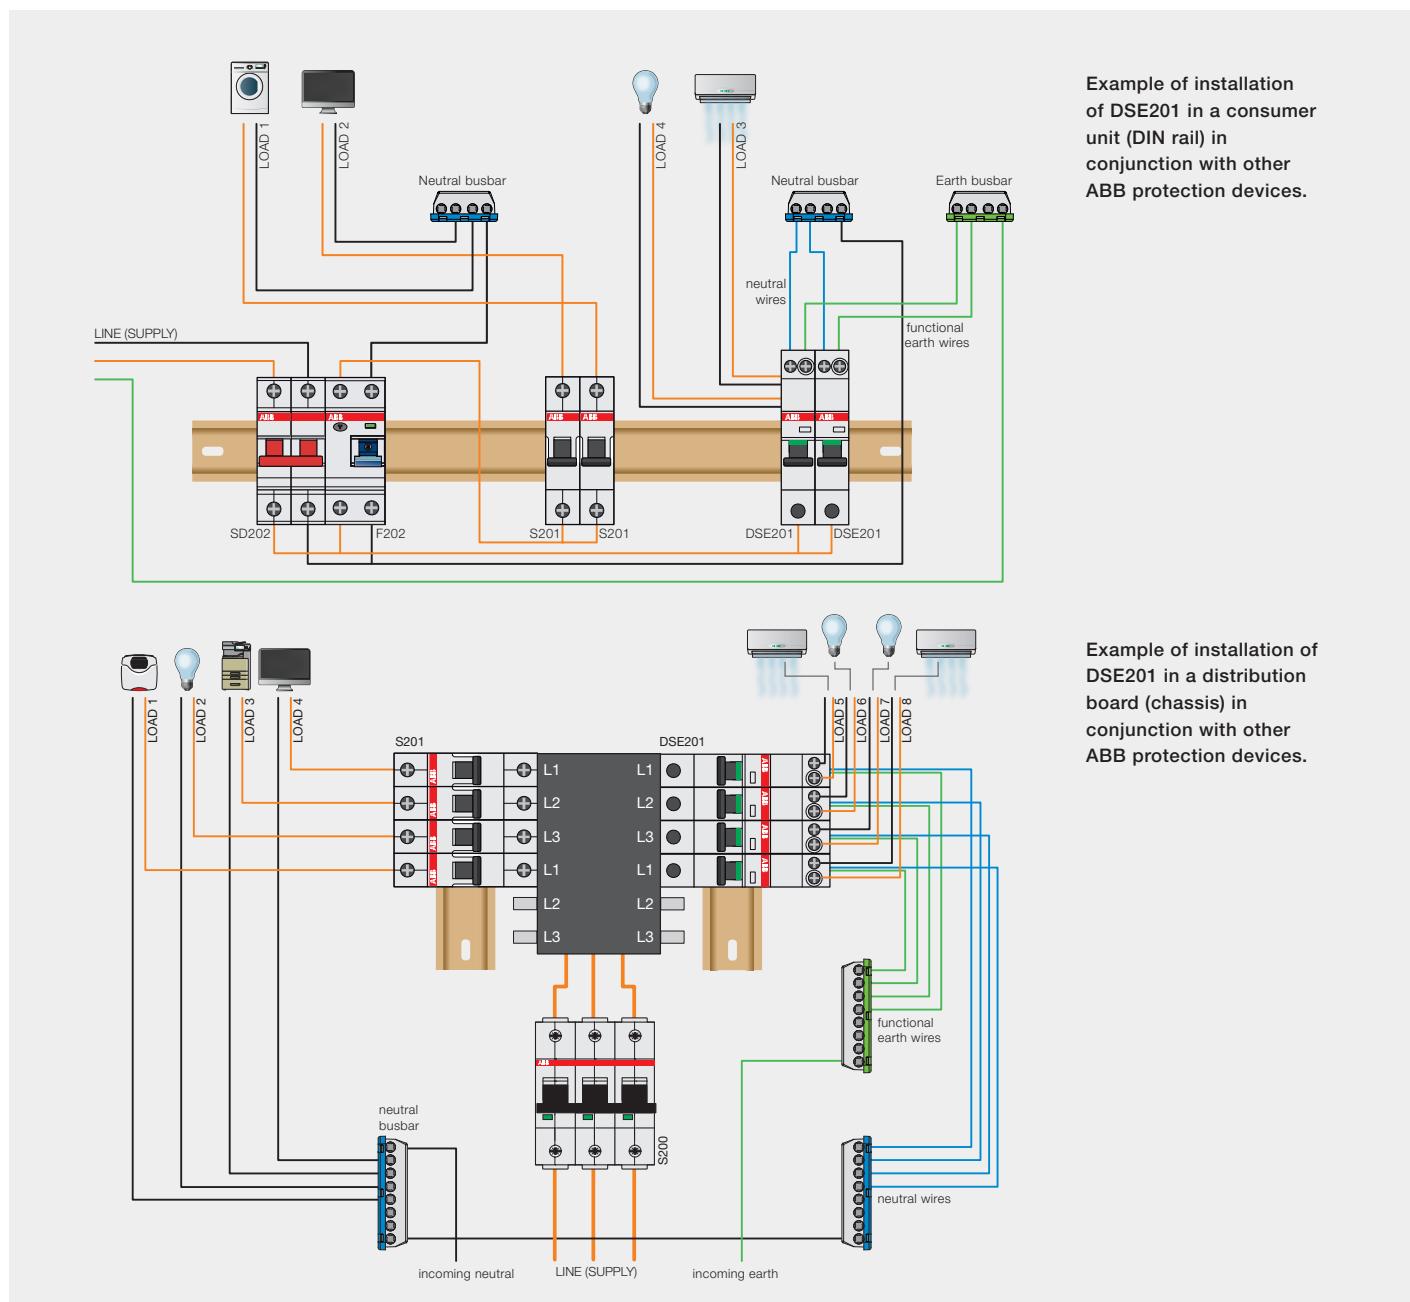

Thanks to its reduced height, only 100 mm, DSE201 makes easier wiring operation inside the consumer unit or the distribution board.

# DSE201: The importance of simplicity

## Smart solutions for easier and safer installation in residential and light commercial applications

With its breaking capacity of 6kA in only one module width and 100mm height, the DSE201 series is the perfect solution for a complete protection in residential and light commercial applications. The series has been renewed with the introduction of rated current 40A and 50A, to cover all the possible different applications.

At home or in the office or in a shop, these devices are essential for the safety of people, utilities and equipment, protecting not only against earth fault residual currents - due to loss of isolation or accidental contact with live parts - but also against overcurrents. The DSE201 series is particularly compact, flexible and easy to install, either in consumer units or in distribution boards.

# DSE201 M, unique solution

## New features to make operations friendly

### Space for insulated screwdrivers

The larger neutral hole allows the use of an insulated screwdriver to tighten the screw of neutral terminals, ensuring maximum operation safety. All versions are equipped with cage type terminals (16mm<sup>2</sup> load side), with tightening torque of 1.2 Nm.

### Earth fault indicator

Blue window in the front of the device to detect any earth fault trip: the cause of trip of the device can be identified in a short time, reducing the downtime for maintenance. DSE201 M is the only device equipped with an earth fault indicator between one module width electronic RCBOs.

### Real contact position indicator below the toggle

Directly linked to the moving contact of the device, the green/red window in the front of the device can identify the current position of the contacts (open/closed) independently on the toggle position.

### Combination with auxiliary elements

New platform suitable for quick installation in combination with the standard auxiliary elements that can be mounted with RCDs and MCBs.

### Easy to install

Fast installation is supported by the two flying leads for neutral cable and functional earth, each integrated in the device, which can be directly connected to the main neutral bar and main earth bar.

### Anti counterfeiting

Each DSE201 is equipped with a RFID tag containing a unique serial number assigned by ABB according to ISO/IEC FCD 15693-3 standard in order to authenticate the product. Through this unique serial number, ABB can easily identify counterfeited products and verify the authenticity of each single device.

### In control

Test button allows the regular check of the functionality of the device: to be pushed every six months.

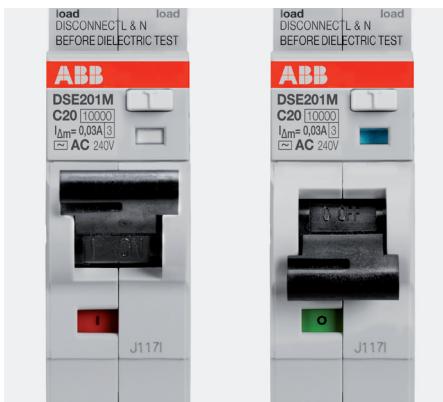

### Reduced height

Thanks to its reduced height, only 115 mm, DSE201 M makes easier wiring operation inside the consumer unit or the distribution board.

# DSE201 M, unique solution

## Distinctive features

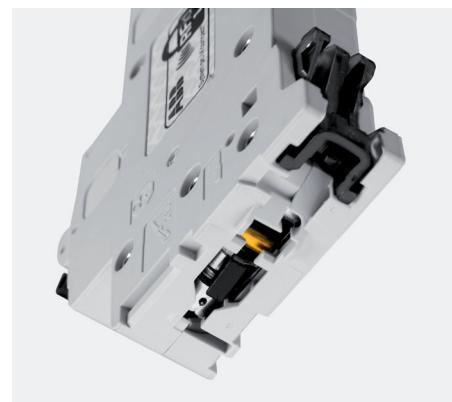

With its breaking capacity of 10kA in only one module width and 115mm height, DSE201 M series is the perfect solution for a complete protection in commercial and industrial applications, where space optimization is particularly required. The unique earth fault indicator window identifies any earth fault trip, making easier the troubleshooting on the network and reducing the downtime for maintenance.

### Device status at a glance

Earth fault indicator: blue window above the toggle to immediately detect and identify any earth fault trip, reducing downtime for maintenance.

Contact position indicator (CPI): green/red window below the toggle to identify the real position of the contacts independently on the toggle position.

### Double slot terminal

Easy to install. Fail-safe line side terminal to avoid improper connection. Two slots of different dimensions (35mm<sup>2</sup> and 10mm<sup>2</sup>) available to allow the connection both with cables and busbars.

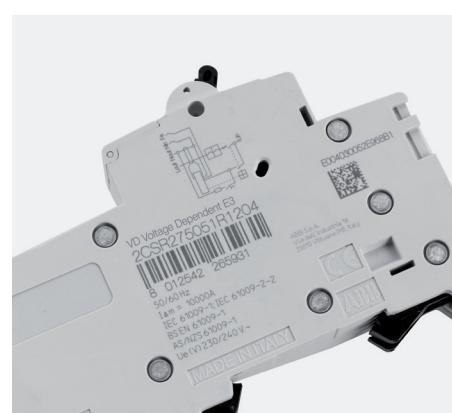

### Load side

Load side terminal accepts cables, both rigid and flexible up to 16mm<sup>2</sup>. Flying leads are straight instead of pigtail ones to reduce the space required for wiring operations.

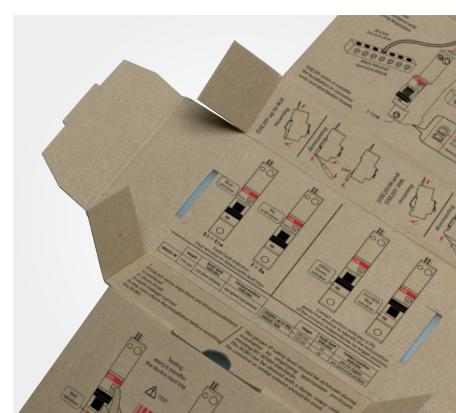

### Easy and flexible

Double and bistable clips with a new design for a secure fixing in any type of consumer unit or distribution board. Easy removal from a cluster of RCBOs/MCBs supplied with Busbars.

### Smart case

Main technical information are laser-printed on the front and left side of product to ensure long readability. On the right side, the tightening torque and the stripping length of the cable for a correct and safety installation of the unit are molded.

### Smart package

Instruction manual printed inside the box with no additional paper wasted. Packaging is glue-less and takes advantage of the adhesive label containing the order information.

# DSE201 M, unique solution

## Combination with auxiliary elements

The new DSE201 M series is suitable for quick installation in combination with the standard auxiliary elements that can be mounted with RCDs and MCBs: auxiliary and signal contacts, shunt trip, overvoltage release, undervoltage release. The auxiliary elements can be mounted directly within the product in few steps, following the same instructions of S200 MCBs.

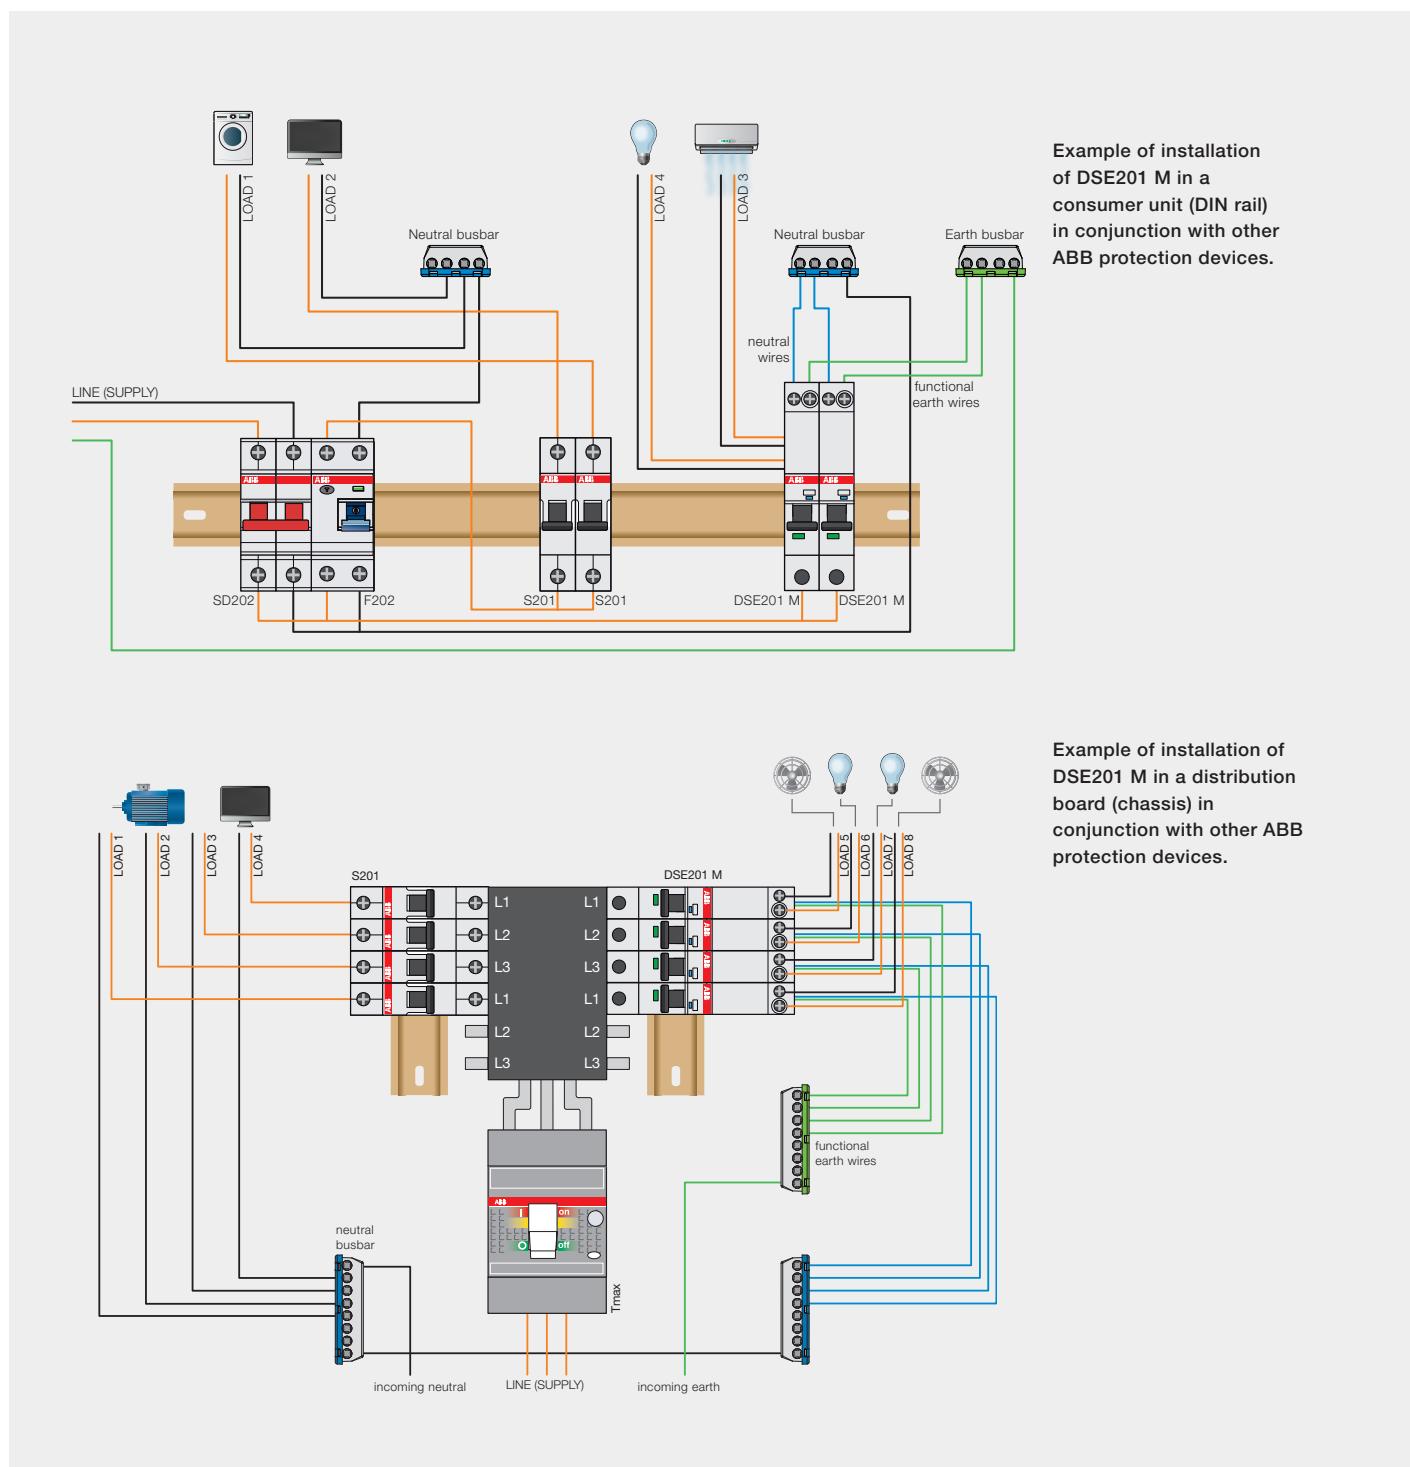

Legend	Description	Accessory name
H	Auxiliary contact	S2C-H6R
H-R	Auxiliary contact	S2C-H6R / S2C-H6-xxR
S/H	Signal/Auxiliary contact	S2C-S/H6R
S/H (H)	Signal/Auxiliary contact used as auxiliary contact	S2C-S/H6R
ST-F	Shunt trip for RCD	F2C-A
UR	Undervoltage release	S2C-UA
OR	Overvoltage release	S2C-OVP
H-BF	Auxiliary contact for bottom fitting	S2C-H01 / S2C-H10

# DSE201M the importance of simplicity

## Smart solutions for easier and safer installation in commercial and industrial applications

With its compact, flexible design, DSE201 M series can be easily installed either in switchboards (mounting on DIN rail) or distribution boards (mounting on chassis). With rated current from 6 to 50A and sensitivities 10, 30, 100 and 300mA, the DSE201 M series can cover all the possible applications in commercial and industrial installations.

# DSE201: Technical details

## Limitation of specific let-through energy $I^2t$ , Peak current $I_p$ and tripping characteristic

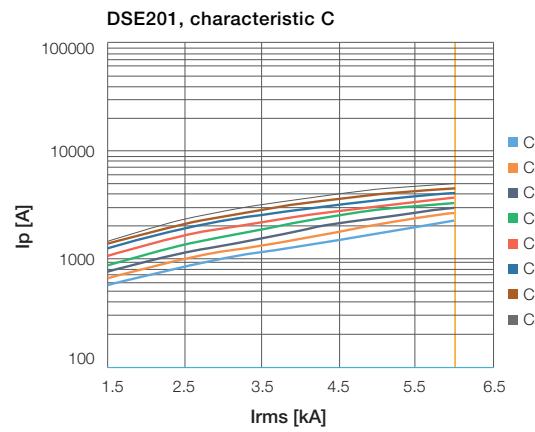

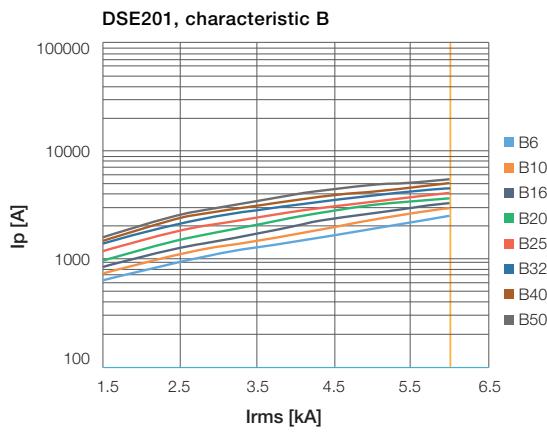

### Limitation of specific let-through energy $I^2t$

The  $I^2t$  curves give the values of the specific let-through energy expressed in  $A^2s$  ( $A$ =amps;  $s$ =seconds) in relation to the perspective short-circuit current (Irms) in kA.

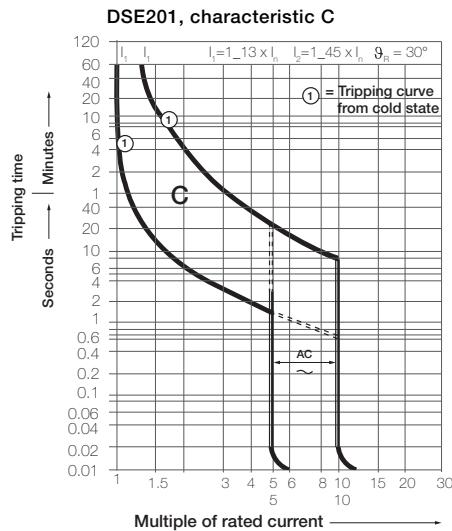

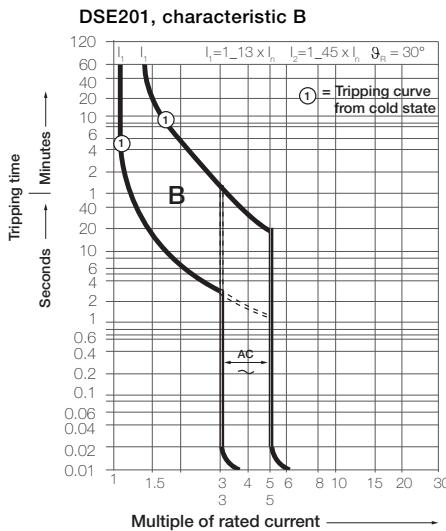

### Peak current $I_p$

The  $I_p$  curves give the values of the peak current, expressed in kA, in relation to the perspective symmetrical short-circuit current (kA).

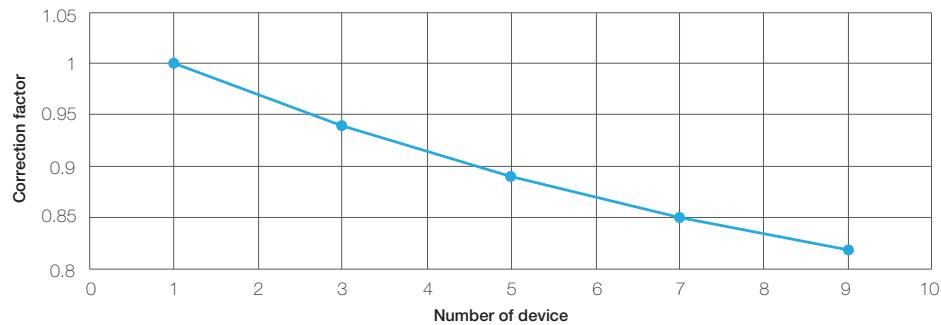

### Tripping characteristic

# DSE201: Technical details

Influence of adjacent devices, derating in temperature, performance in altitude and power loss

## Influence of adjacent devices (DSE201 up to 32A)

N. of devices	Correction factor
1	1
3	0.94
5	0.89
7	0.85
9	0.82

## Derating in temperature

In	Temperature (°C)									
	-25	-20	-10	0	10	20	30	40	50	55
6A	8.1	8.0	7.8	7.4	6.9	6.5	6.0	5.9	5.8	5.7
10A	13.8	13.5	13.0	12.3	11.6	10.8	10.0	9.9	9.7	9.7
16A	19.7	19.5	19.1	18.5	17.6	16.6	16.0	15.8	15.5	15.4
20A	23.7	23.5	23.2	22.7	21.6	20.5	20.0	19.7	19.4	19.2
25A	30.2	29.9	29.2	28.4	27.0	25.7	25.0	24.6	24.1	23.9
32A	39.4	38.8	37.7	36.4	34.7	33.0	32.0	31.4	30.7	30.4
40A	50.3	49.4	47.9	45.6	43.6	41.5	40.0	39.0	38.4	38.1
50A	61.1	60.4	59.2	57.1	54.4	51.7	50.0	48.8	48.0	47.9

Max operating current depending on the ambient temperature of a circuit breaker in load circuit of characteristics type B and C

## Performance in altitude

Elevation (m)	3000	4000	5000	6000
Rated Current (A)	0.96 x In	0.94 x In	0.92 x In	0.90 x In
Rated Voltage (V)	0.877 x Un	0.775 x Un	0.676 x Un	0.588 x Un

## Voltage drop, power loss and internal resistance

In	Voltage drop (V)	Power loss (W)	Internal resistance (mΩ)
6A	0.42	2.5	70
10A	0.25	2.5	25
16A	0.24	3.8	15
20A	0.27	5.5	14
25A	0.15	3.8	6.1
32A	0.16	5.2	5.0
40A	0.14	5.5	3.4
50A	0.11	5.3	2.1

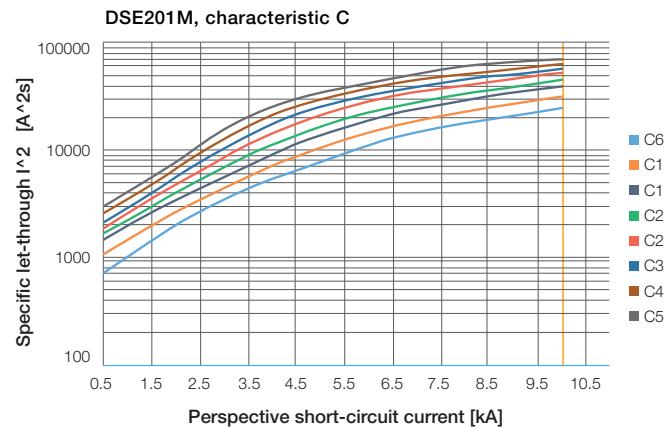

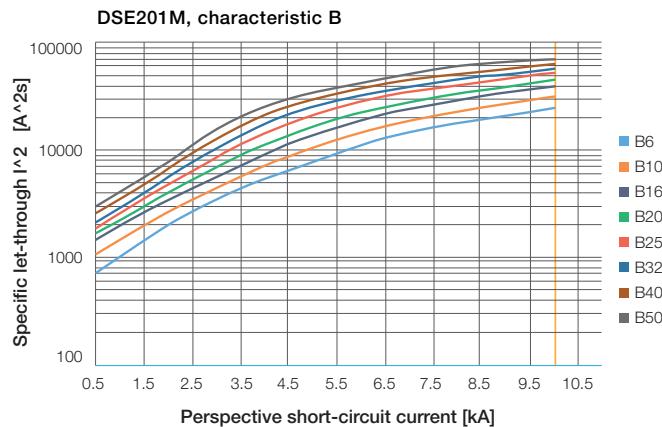

For the coordination tables, refer to the values published in SOC- Selected Optimized Coordination tool

# DSE201M: Technical details

## Limitation of specific let-through energy $I^2t$ , Peak current $I_p$ and tripping characteristic

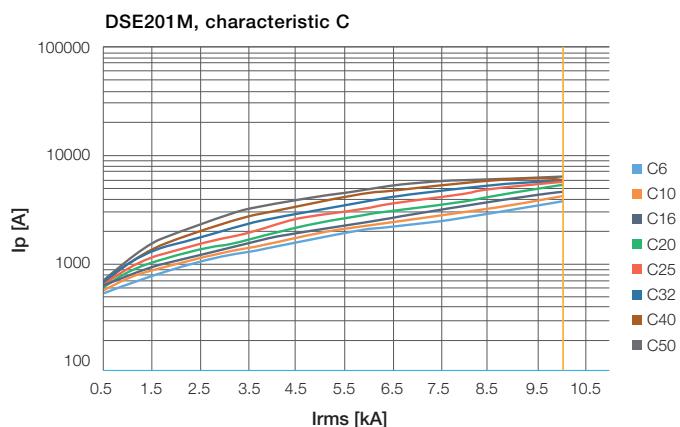

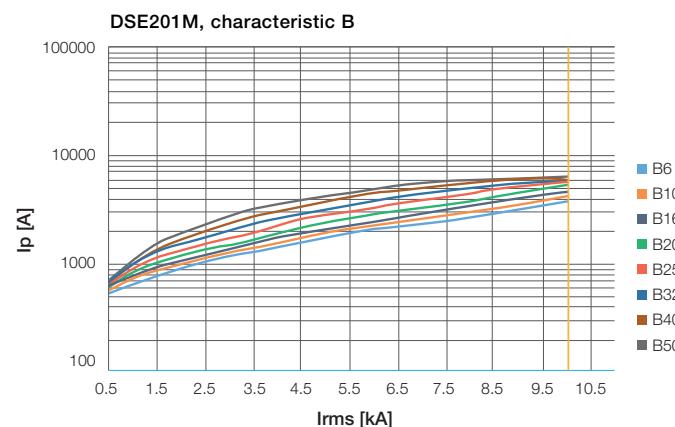

### Limitation of specific let-through energy $I^2t$

The  $I^2t$  curves give the values of the specific let-through energy expressed in  $A^2s$  ( $A$ =amps;  $s$ =seconds) in relation to the perspective short-circuit current ( $Irms$ ) in kA.

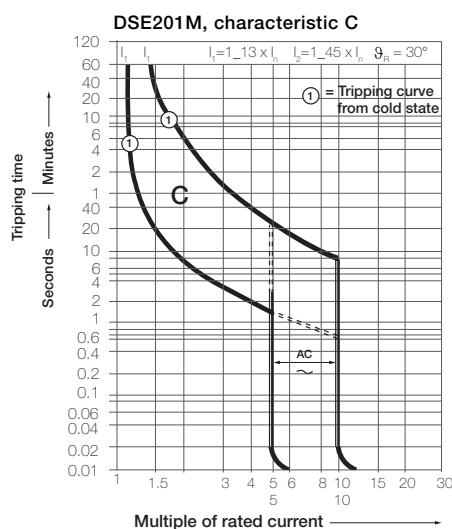

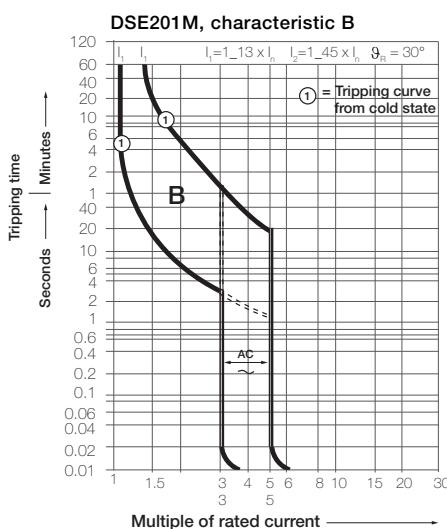

### Peak current $I_p$

The  $I_p$  curves give the values of the peak current, expressed in kA, in relation to the perspective symmetrical short-circuit current (kA).

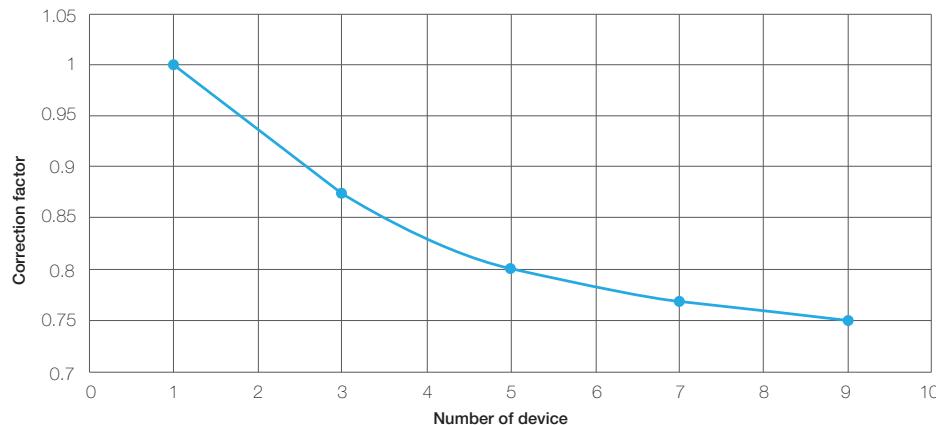

### Tripping characteristic

# DSE201 M: Technical details

## Influence of adjacent devices, derating in temperature, performance in altitude and power loss

### Influence of adjacent devices (DSE201M and DSE201 40A-50A)

N. of devices	Correction factor
1	1.00
3	0.87
5	0.80
7	0.77
9	0.75

### Derating in temperature

In	Temperature (°C)
