ABB solar inverter
Quick Installation Guide
UNO-DM-1.2/2.0/3.0/3.4/4.0/4.6/5.0-TL-PLUS
(from 1.5 to 5.0 kW)

1. The labels on the inverter include the markings, main technical data and the identification of the equipment and of the manufacturer.

2. The inverter model referred to in this installation guide can be available in six power capacity systems: 1.2 kW, 2.0 kW, 3.0 kW, 3.4 kW, 4.0 kW, 4.6 kW and 5.0 kW.

3. For each model, the following variants are available ( suffixes could be combined):
   - Models equipped with UNO-DM-3.3-TL-PLUS Ethernet COM Kit (optional)
   - Models equipped with UNO-DM-5.0-TL-PLUS Ethernet COM Kit (optional)

4. The means used for lifting must be suitable to bear the weight of the equipment.

5. The technical documentation and the interface and management software for the product are available at the website.

6. In the manual, and/or in some cases on the equipment, the danger or attention zones are indicated by signs, labels, symbols or icons.

7. The means used for lifting must be suitable to bear the weight of the equipment.

8. The technical documentation and the interface and management software for the product are available at the website.

9. In addition to what is explained in this guide, the safety and installation instructions shown in the installation manual. The technical documentation and the safety instructions are available on the product or on the website.

10. Components supplied with the inverter:

   - DC side connectors (Spare part) T20 screw for front cover
   - External ground connection
   - Wireless antenna connector

11. The inverter must be used in accordance with the values described in the Quick Installation Guide. Otherwise, the protection guarantees may be affected.

12. The labels placed on the equipment absolutely MUST NOT be removed, damaged, dirtied, folded, etc.

13. In the manual, and/or in some cases on the equipment, the danger or attention zones are indicated by signs, labels, symbols or icons.

14. The labels placed on the equipment absolutely MUST NOT be removed, damaged, dirtied, folded, etc.
