Thank you for choosing ABB product
Please read this document thoroughly before commencing installation and retain for future reference. Contact ABB customer service in Australia on 1800 60 20 20 if you need any assistance. The installation instructions were correct at the time of print. To reflect changes in technology and Australian standards; ABB reserves the right to amend the instructions without notice. Updated document can be found on the Stanilite website.

Safety warning
In Australia and New Zealand, only licensed electricians are permitted by law to work with 240 volt electrical installations. Do not attempt to service other parts of the fitting as this will void the warranty. As the installer, it is your responsibility to ensure compliance with all relevant building and safety codes, (ie: AS/NZS 3000, AS/NZS 2293). Refer to the applicable standards for data and mains cabling installation procedures and requirements.

Important to note:
• This product is designed for indoor use only.

Nexus RF (wireless system)
The Nexus RF range of light fittings are designed to communicate via a proprietary RF network, however the electrical installation of the fittings is identical to that of a standard non-monitored fitting. The RF communication module and antenna need to be installed recessed in the wall or ceiling space.

Troubleshooting guide
If you have installed and connected the fitting as per the instructions listed earlier and it does not function correctly, use the following table as a guide to fixing the problem. Look up the type of fault in the left column and check the possible causes from the right column.

If the fitting still does not work after checking these possible causes, contact ABB customer service in Australia on 1800 60 20 20.

Important: Carefully read this installation manual before installing or using the fitting. This installation manual provides important information about the correct installation, use, maintenance and disposal of this product.

Please observe the following guidelines
1. The fitting should only be installed by qualified personnel and installation must be in accordance with AS/NZS 3000 and local regulations.
2. This product may not be modified in any way so ever or used for a purpose or in an environment other than for which it is designed. Failing to observe these guidelines will invalidate the warranty and the compliance of this product.
3. Before installing the fitting, the supply must be isolated.
4. The light source in this fitting is non-replaceable.

Installing and connecting
1. This fitting should be connected to the voltage equivalent to that indicated on the type label. This fitting is fitted with a terminal block suitable for loop-in-loop-out connection. The earth terminal is provided for convenience of wiring through only and should not form part of any protective shield. For further information on the different connection possibilities, see the instructions in this installation manual.

Installation instructions
Important: Triangular markings indicate how to place the e-box with respect to the first-fix. Check correct orientation before placing first-fix.

Important: 24 hours is required to allow the fitting battery to reach full capacity, ie: prior to a discharge test. As the installer, it is your responsibility to conduct the initial discharge testing of the installed fitting. Refer to AS/NZS 2293.

Testing precautions
Once the fitting is permanently connected to the mains supply, a commissioning discharge test as required in AS/NZS 2293.2 must be carried out. You will need to allow 24 hours for the battery to fully charge prior to conducting this test, presently (at the time of writing), the standard requires that fittings operate in emergency mode for a period not less than 2 hours for their commissioning test and for not less than 90 minutes thereafter (It is required that 6 monthly discharge tests be carried out). You will need to keep the records for the commissioning test and enter them into the building emergency services logbook or via other recording methods as allowed by AS/NZS 2293.2.
