

NeoGear™

Join the switchgear revolution

ABB's low-voltage switchgear has been the product of choice since 1972. Now we introduce the next innovation leap in switchgear technology: **ABB NeoGear - a safe, smart and sustainable solution.**

Safe

 <p>Revolutionary design eliminates hazardous exposure to live busbar parts</p>	 <p>Arc ignition protected zones keep maintenance personnel safe</p>	 <p>Reduced risk of arcs caused by mechanical failures slashes maintenance and down time</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Smart

 <p>92% fewer busbar parts than traditional switchgear</p>	 <p>30% reduction in operational costs through predictive maintenance, increasing uptime and performance</p>	 <p>90% fewer electrical joints for highest switchgear availability</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------

Sustainable

 <p>20% less heat dissipated saves energy and lowers cost thanks to excellent cooling efficiency</p>	 <p>Efficient use of reduced CAPEX budgets for quicker return on investment</p>	 <p>Up to 25% less space needed - reduced switchgear footprint brings space savings</p>
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------
