

WellTell Wireless Life Cycle Update

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime-extending services. At the same time, the model ensures access to continuing support for our customers.

Current life cycle status

The mentioned product, **WellTell Wireless**, is formally in the **Limited** life cycle phase since 2022-07-04, according to the defined ABB life cycle management model specified above.

1 Life cycle plan

It is planned to keep the mentioned product in the **Limited** life cycle phase until the end of 2023, after which it will be transferred to the **Obsolete** life cycle phase.

2 Recommended actions

Besides the regular maintenance actions, due to the shorter life cycle of the hardware available, ABB recommends modernizing your solution when needed with our new products such as the XIO as a remote I/O expansion.

3 Product availability

Manufacturing of this **WellTell Wireless** has stopped, and it is not available for sale, as the electronic components are obsolete. The WellTell Wireless service option is available only until the end of 2023, or while the limited inventory is available.

4 Service availability

ABB offers a complete portfolio of services to ensure trouble-free operation and extended product lifetimes.

Training

Service contracts

Specialized support

Installation and
commissioning

Spare parts

Engineering and consulting

Repair and refurbishment

Yours sincerely,

Giulia R. Seikel
Product Line Manager - Flow Computer & RTU
