

# T315 System 800xA Engineering

## Course Description

## Course Duration

The duration is 10 days.

## Course Type

This is an instructor led course with interactive classroom discussions and associated lab exercises. Approximately 50% of the course is hands-on lab activities.

## Course Goal

The goal of this course is to learn the engineering of the Extended Automation System 800xA with AC 800M controllers.

## Student Profile

This training is targeted to application engineers, programmers and system integrators.

## Prerequisites and Recommendations

Students shall know the fundamentals of working with Control Systems and have basic knowledge of Windows 2000.

## Course Objectives

Upon completion of this course, students will be able to:

- Explain the System 800xA architecture and the function of the different components
- Navigate in the system and create new objects / aspects
- Create a new project and plan the structure of application programs
- Configure the AC 800M hardware and corresponding I/O's

- Design and configure application programs by using a variety of IEC 61131-3 languages
- Setup the OPC connectivity to AC800M
- Develop project specific libraries
- Configure graphic displays, faceplates and graphic elements
- Manage and configure alarm and events
- Configure historical data and trends
- Configure workplaces and user accounts
- Backup / restore System 800xA data
- Use the Function Designer and Signal objects
- Use bulk data handling with templates

## Main Topics

- System 800xA architecture
- Engineering Workplace
- Project and application structures
- AC 800M Hardware
- OPC connectivity
- Applications with FBD and ST
- Control Modules
- Sequential Function Charts (SFC)
- Alarm and Events
- Historian and Trends
- Graphic Displays
- Faceplates and Graphic Elements
- Operator Workplace
- Function Designer
- Backup / restore

## Course Calendar

### T315 System 800xA Engineering

#### Part 1 (T315A)

Day 1	Day 2	Day 3	Day 4	Day 5
<ul style="list-style-type: none"> <li>• Course overview</li> <li>• System 800xA architecture</li> <li>• Engineering Workplace</li> <li>• Project framework</li> <li>• AC 800M hardware</li> </ul>	<ul style="list-style-type: none"> <li>• AC 800M hardware</li> <li>• OPC connectivity</li> <li>• Standard libraries</li> <li>• Applications with Function Block Diagram</li> </ul>	<ul style="list-style-type: none"> <li>• Applications with Structured Text</li> <li>• Task assignment and Memory</li> <li>• User defined Function Block types</li> </ul>	<ul style="list-style-type: none"> <li>• Control Modules</li> <li>• Sequential Function Charts (SFC)</li> </ul>	<ul style="list-style-type: none"> <li>• Communication between applications</li> <li>• Alarm and Events</li> </ul>

#### Part 2 (T315B)

Day 6	Day 7	Day 8	Day 9	Day 10
<ul style="list-style-type: none"> <li>• Graphic displays</li> <li>• Graphic elements</li> <li>• Faceplates</li> </ul>	<ul style="list-style-type: none"> <li>• Faceplates</li> <li>• Historical data collection</li> <li>• Trend displays</li> <li>• Operator Workplace</li> </ul>	<ul style="list-style-type: none"> <li>• Workshop “Engineering”</li> </ul>	<ul style="list-style-type: none"> <li>• Security</li> <li>• Backup and restore</li> <li>• Function Designer</li> </ul>	<ul style="list-style-type: none"> <li>• Signal objects</li> <li>• Bulk data handling</li> <li>• Miscellaneous</li> </ul>

In Sweden the course is performed as two separate courses (T315A and T315B)
