

BUSINESS AREA: PROCESS AUTOMATION

ABB Measurement & Analytics

Facts & Figures

ABB Measurement & Analytics is among the world's leading manufacturers and suppliers of smart instrumentation and analyzers. With thousands of experts around the world and high-performance digital technology, the division is working at the heart of industrial digital transformation, making some of the world's toughest and most important measurement challenges easy. The team serves industrial and energy customers by providing data that helps them operate more efficiently and profitably. ABB's Measurement & Analytics employees ensure ongoing service and support in 15 factories and service support centers in around 60 countries around the world.

Revenues

\$750–1,250 million

Market position

No. 1 Analytical & Force Measurement
No. 2–5 Instrumentation

Key market drivers and trends

- **Sustainability and regulations:** International regulations for GHG reduction and water directives drive the demand for emissions monitoring in industrial processes and quality and leakage detection in oil & gas and water & wastewater.
- **Energy transition:** Measure and control process data to operate more efficiently.
- **Digitalization:** Leverage sensor technology for industry's digital transformation.
