

# LLT100

## Lasers for level: Now everything is possible

The LLT100 is the next generation of ABB laser level transmitters for process control systems. Its innovative features make it even simpler to use: loop powered, embedded display, and offered in a variety of process interfaces.

Specifically made for industrial applications, it provides continuous level control for a low cost of ownership due to its simplicity and reliability.

### Features:

- Easy setup menu
- Narrow laser beam easy to use
- Measures any solids and liquids
- 2-wire powered and HART 7 communication
- Explosion proof C1/D1 (zones 0/1)
