Case Study; Partner in Machinery for use in Steel Fabrication

Client
- Burlington Automation, Canada

Application
- Plasma cutting

Key Drivers & Benefits
- The system is capable of doing the work of conventional drill, beam, flanger, angle and bar lines, coping machines, band saws, marking machines and small burning tables
- Results in a cleaner shop that is more agreeable to work in due to fume- and dust-extraction equipment

More information in Metal Magazine January 2008, page 9-11
• Reduces both cost – capital and maintenance – and time. Burlington also provides ongoing support and regular software upgrades.
