NOTES:
1. **WARNING:** This drawing does not illustrate completely the installation methods required for hazardous locations. Prior to any installation in a Classified Hazardous Location, verify installation methods by the Control Drawing referenced on the product’s name tag and national and local codes.

2. Software for Plunger Lift Valve Control is included with the XFC. Consult the XFC User Manual to set-up and operate:

   - **XFC-Series Flash**
   - **IEC Advanced**
   - **IEC w/Safety**
   - **Turner Curve**

XFC Board 2100204

---

XFC TO CASING PRESSURE & TUBING PRESSURE TRANSDUCERS

---

A TFIO Module is required to manage Versa-Valves with an XFC. For wiring Production Valve “A”, Blow Valve “B” and an Arrival Sensor to the 8/Combo Digital TFIO, SEE SHEET 2.
NOTES, continued:

3. LED Indicators:
   - Run LED – Blinking indicates on-board PIC running.
   - Activity LED – Blinking indicates buss activity.
   - Mode LED – 00 = Normal 01 = Reset

4. LED Operation:
   - Register 0.7.7 = 0 – Power Save Mode (LEDs off when MMI disconnected)
   - Register 0.7.7 = 1 – LEDs on all the time.

5. Dip Switch factory default address is set at 0. If another COMBO IO/VC INTF TFIO is added, move that Dip Switch setting to 1. If more are added, use the next address in line for each.
   - Changing the address applies only to TFIOs of their own type, and not TFIOs of another type; those would also start at 0 and add new address of their own.
   - TIP: While 0 is recommended for the first one, any address can be used (But keep in mind the original config files in our software are built with this address and factory tests will look for it).

If a 3-Wire Sensor is used, wire Signal and GND as shown, and add Power from VBATT; J4, Pin 2 of the XFC.

SEE SHEET 1

To VBATT: Located on J4, Pin 2 of the XFC
SEE SHEET 1

TFIO 8-POINT COMBO DI/DO/PI MODULE (2100543), PRODUCTION VALVE “A”, BLOW VALVE “B” AND ARRIVAL SENSOR
