**What is ABB Connect?**

- ABB Connect is the Electrification business mobile application presenting our low- and medium-voltage offering in a simple yet effective way.
- Gives the user the ability to browse by product family, industry and solutions.
- Due to integrations with other ABB platforms (e.g. ABB Library) you can easily download and view the latest documentation and supporting material.
- ABB Connect comes from a background of supporting the ABB sales teams with features such as presentation creation, offline mode and local news and updates.
- A dedicated team continues to evolve and develop ABB Connect with continued release updates throughout the year

Make your phone or tablet your **workspace**.

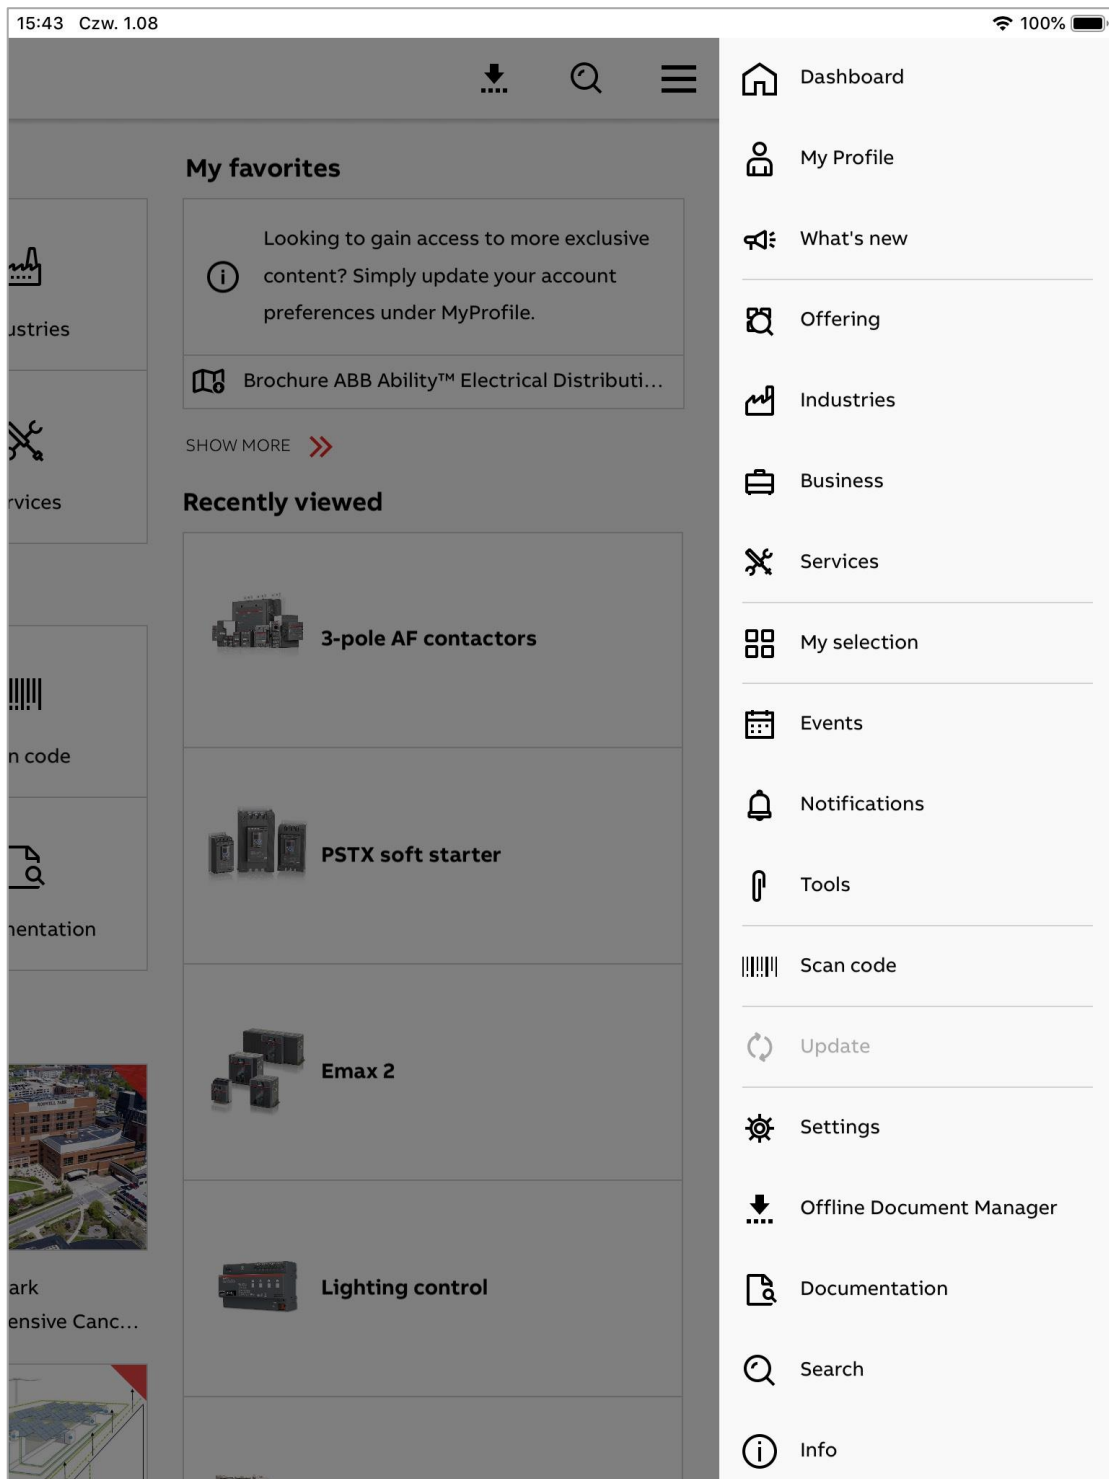

Tap and stay **connected** to all the latest information.

Find the **latest product** details.

---

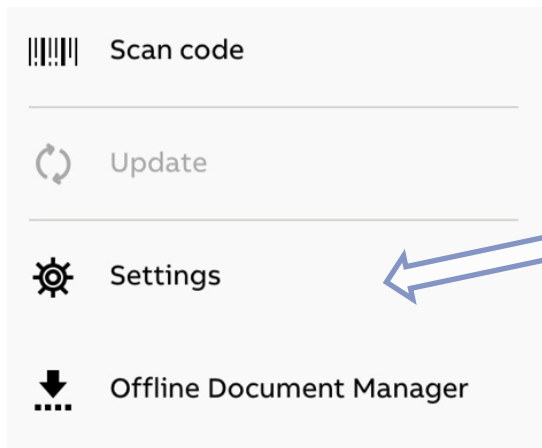

## Side menu

1. To access the side menu, tap on top right hamburger  icon.
2. Menu will slide from left side allowing you to quick access all app functions.

## Logging in

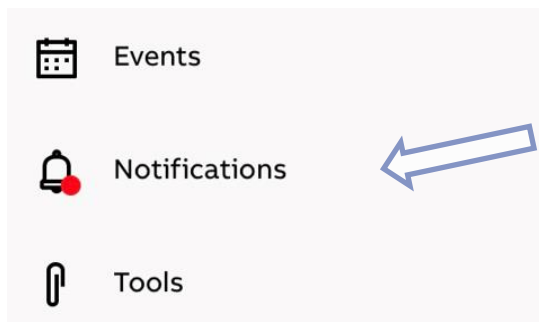

1. To log in first select **Settings** from the side menu.

2. Tap the  button on the right side and type in your ABB credentials to log in and access additional features.

## Notifications

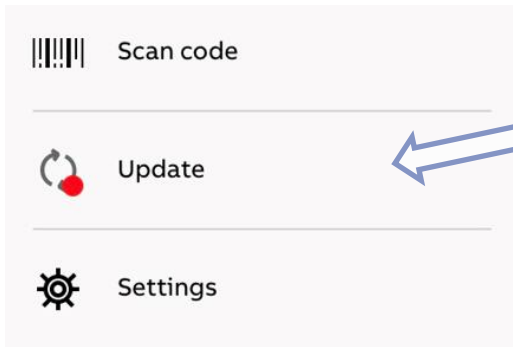

1. Tap the top right hamburger  icon when its highlighted with red dot.
2. Choose the **Notifications** button to see latest news or product updates, if no new notifications are available, the section remains empty.

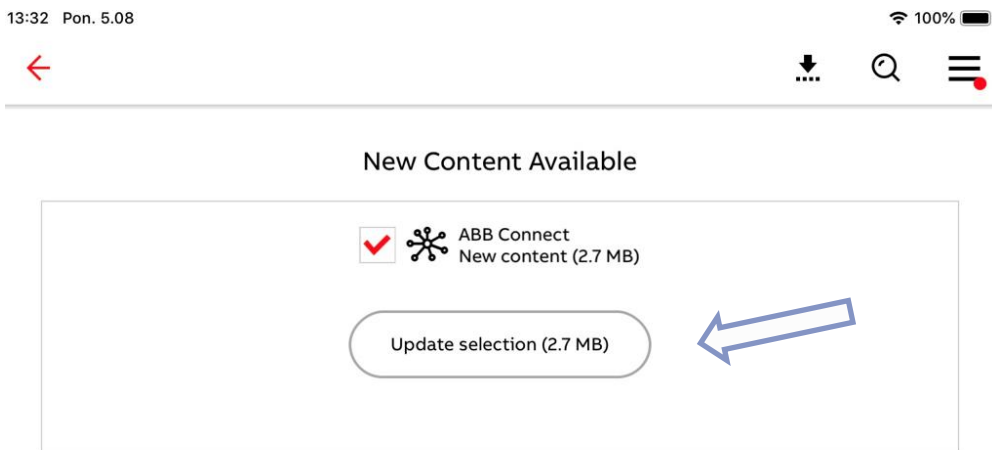

3.  <sup>New</sup> tab contains recently added notifications.
4.  <sup>All</sup> tab beside recently added notifications, contains previously added notifications not

## Update

1. Tap the top right hamburger  icon when its highlighted with red dot.
2. Select the **Update** button to access app update menu.

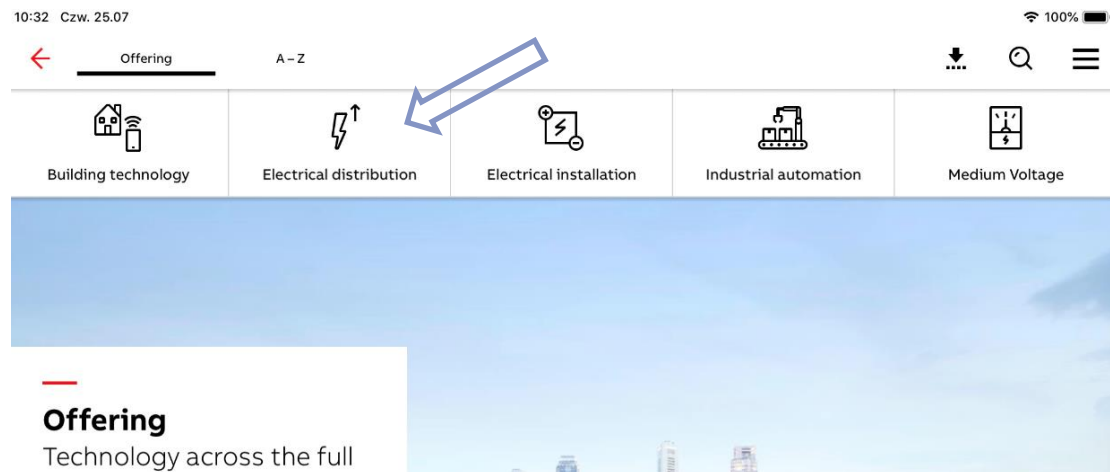

3. Make sure ABB Connect New content checkbox is selected and press **Update selection** button.

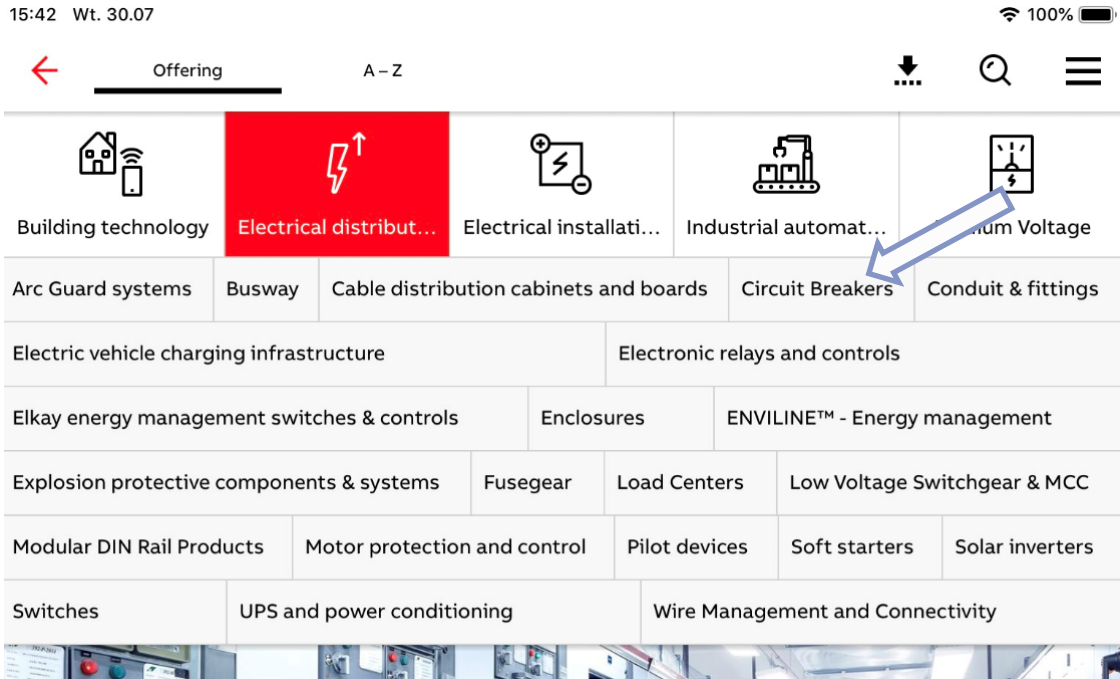

## Offering

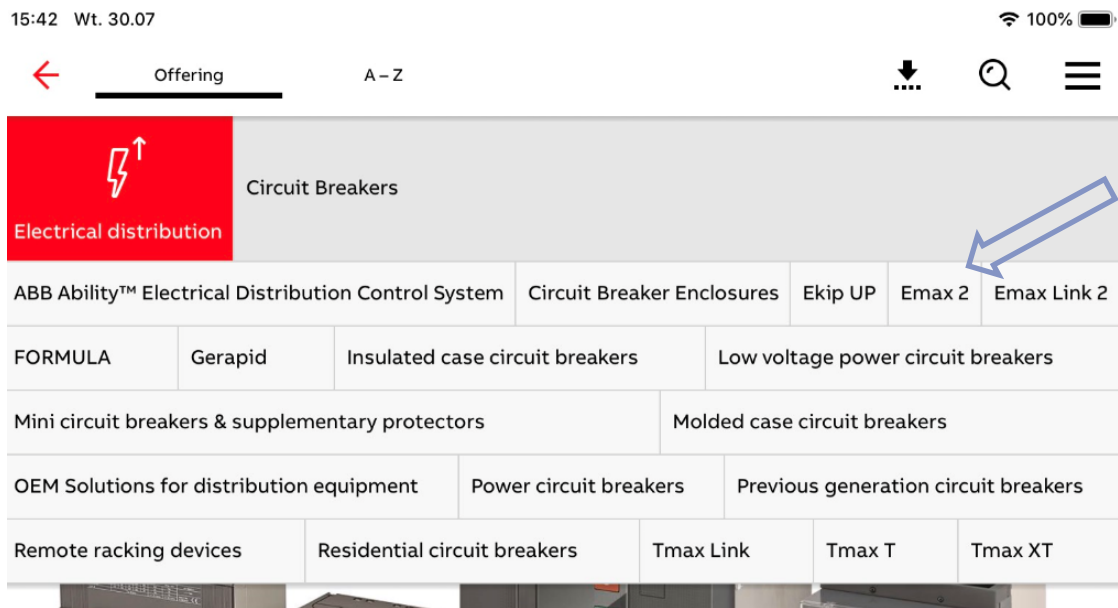

1. To navigate to the offering first select a category.

2. Now choose a subcategory.

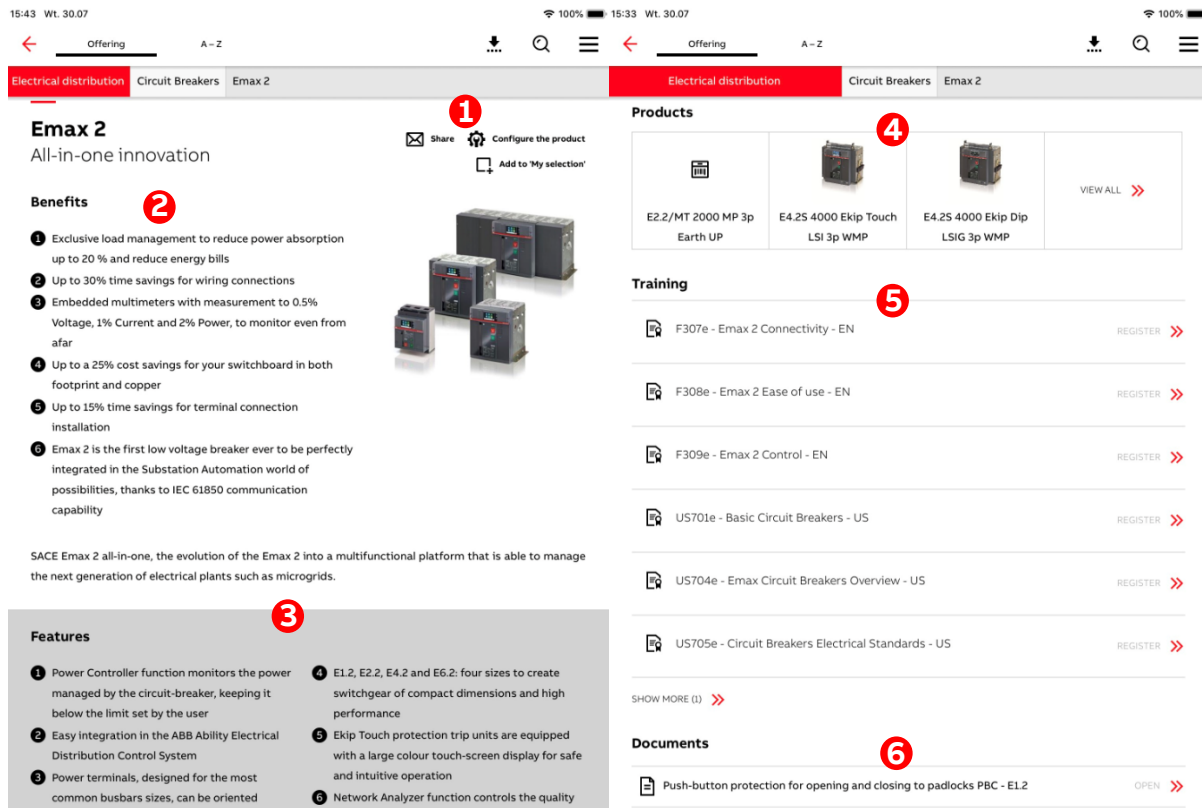

3. Finally, choose a product family you want to inspect.

## Offering product family key features

At the Product family view you can see variety of information:

### 1. Interaction buttons

- a.  **Configure the product** (Redirection to e-configure platform)
- b.  **Share** (Share product family via email)
- c.  **Add to 'My selection'** (Add to favorites or presentation)
- d.  **Go to web page** (Additional product related information on web can be accessed here)

2. Key product benefits area

3. Key product features area

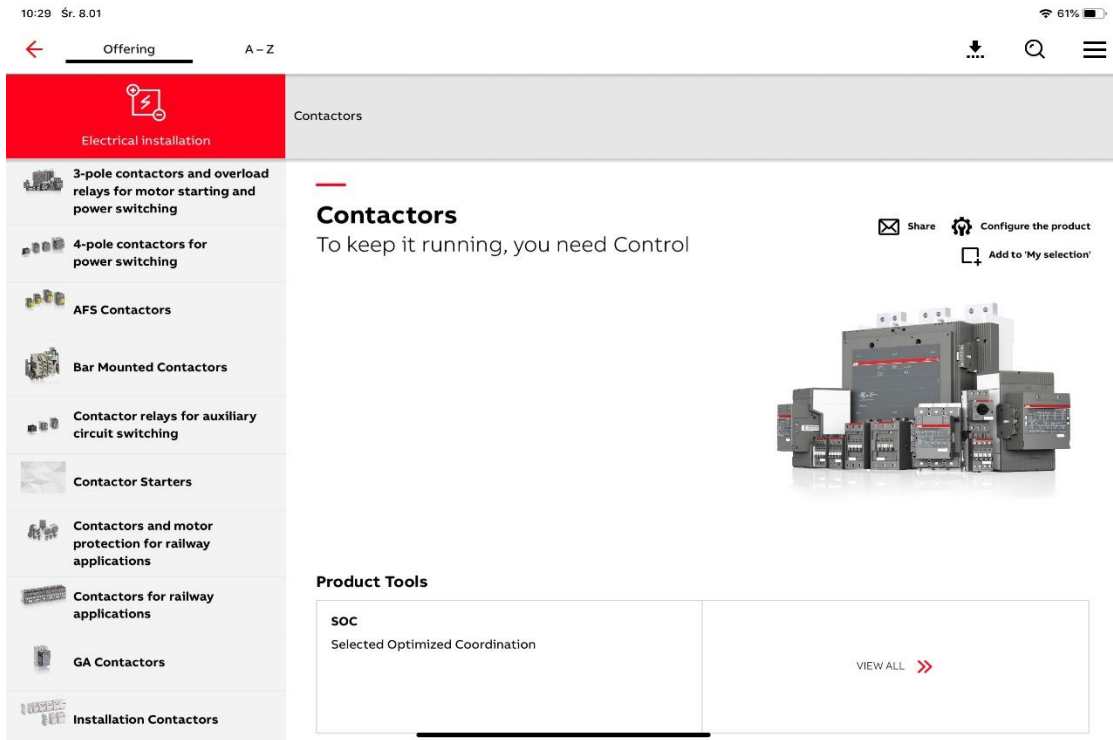

4. PIS product information

5. Trainings associated with chosen product family

6. Documents associated with chosen product family

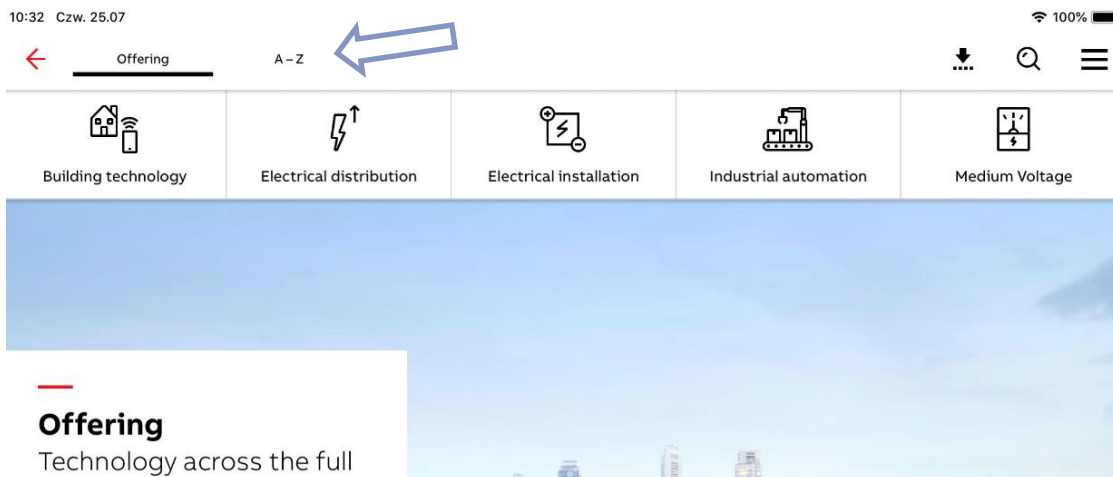

All Product-relevant tools can be found on the product page under **Product Tool** section.

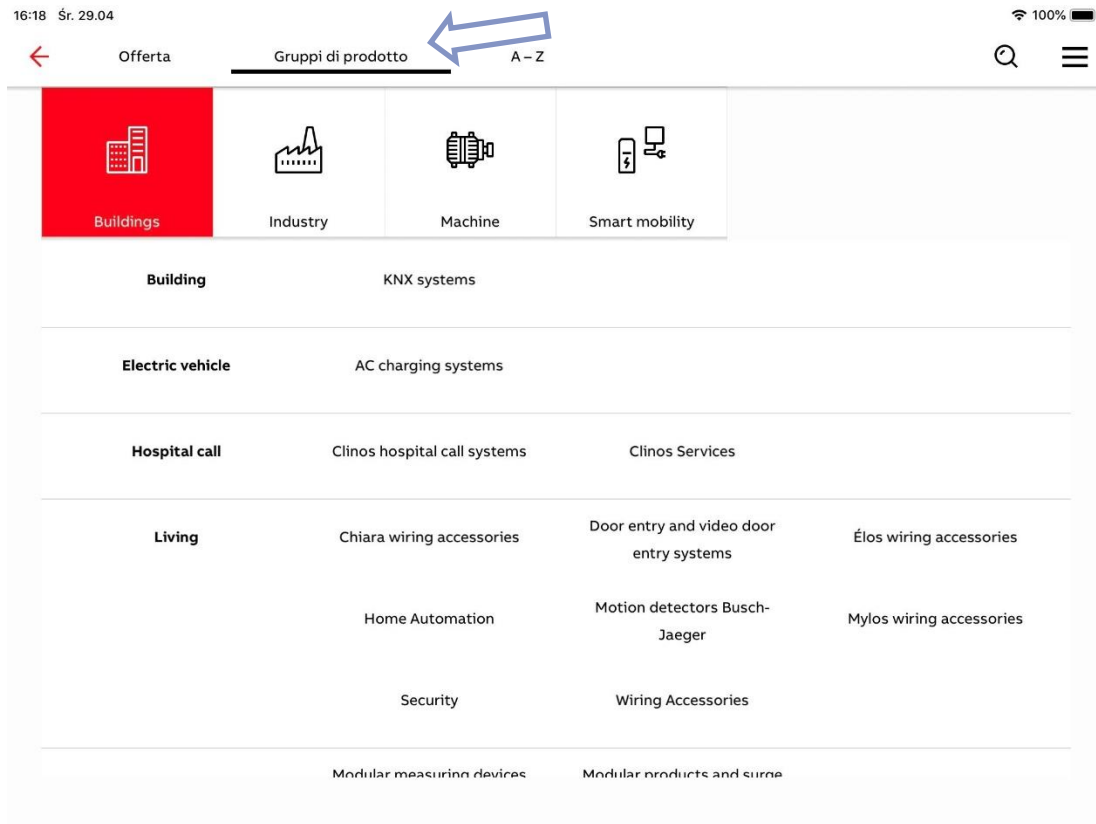

## Offering alphabetical sorting

1. To sort documents available in Offering navigation alphabetically, press on A-Z button.

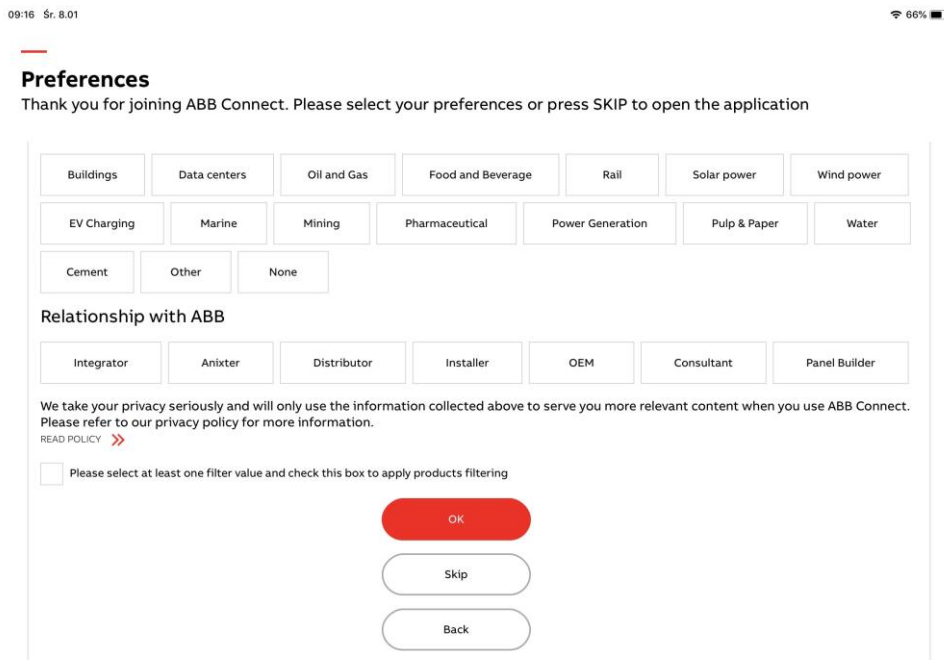

## Birds-eye view (Italy only\*)

- To see Birds-eye view version of product offering structure click **Gruppi di prodotto** button.

## Product catalogue filtering

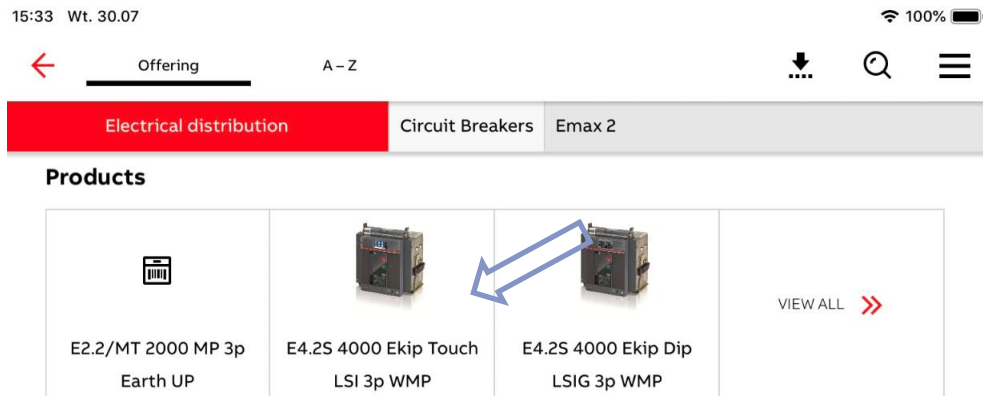

- To filter visible product catalogs section go to  My Profile
- Select preferred product catalogs.

3. Check  Please select at least one filter value and check this box to apply products filtering and confirm by clicking **OK** button box

## PIS products information

1. To check product details from the PIS, tap on a product you want to inspect in product family view.

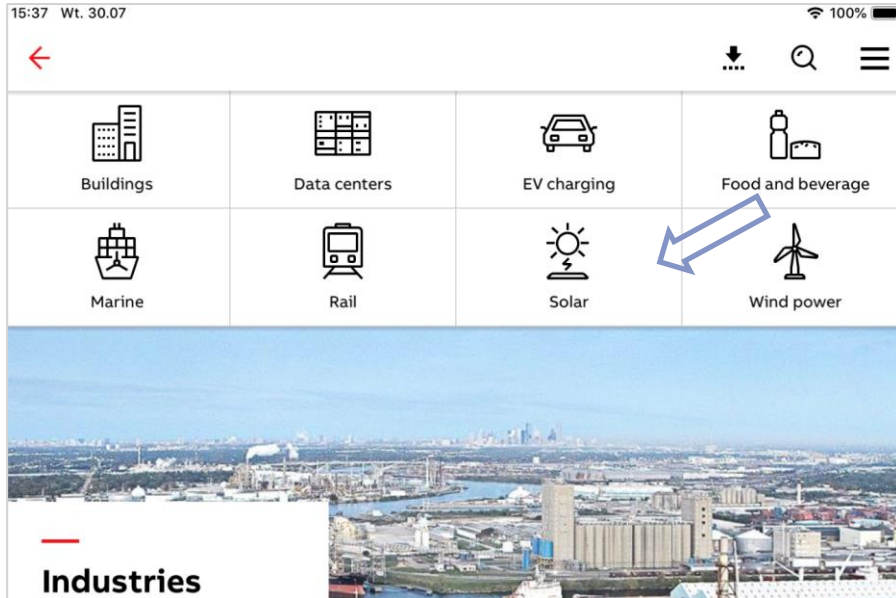

2. From this menu you are able to view PIS product details, in addition to:

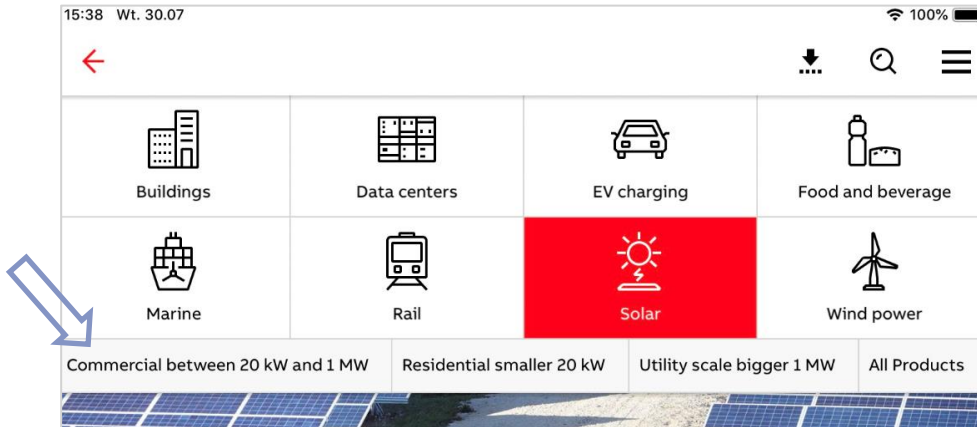

- a)  **Add to 'My selection'** Add to favorites or presentation
- b)  **Share** Share product via email
- c)  **Web page** Go to the abb.com product page
- d)  **Adicionar ao carrinho** Add products to cart (Brazilian version only\*)

# Industry

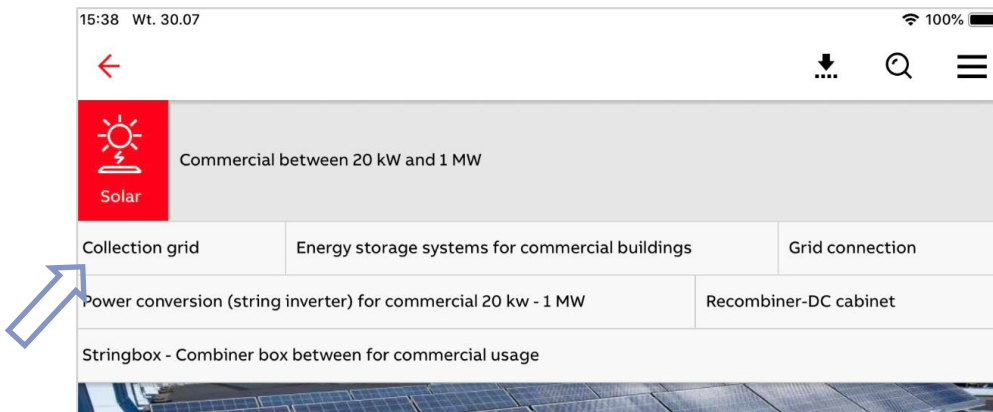

1. To navigate to the Industry Offering tree, first select a category:

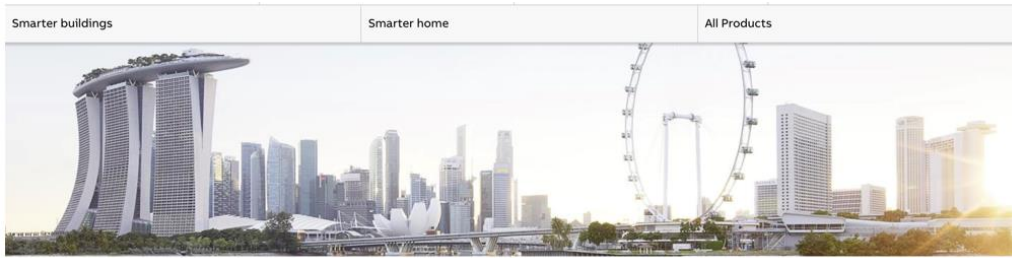

2. Now choose a subcategory.

3. Finally, select a product family you want to inspect.

To quick access more information for selected industry click  Go to web page link.

**Buildings**

ABB makes the future smarter
