

A perfect atmosphere... }

{ ...that reflects your personality.

ABB tacteo® KNX

The individual touch

KNX sensors made of glass for the most demanding individual requirements of high class residential buildings, luxury hotels and public buildings. The ABB tacteo® KNX Sensor is an individually-configurable control element for intelligent building management. This makes each sensor unique in design and function. Use the ABB tacteo® configurator to design your own individual KNX sensor completely in line with your requirements. Find out more at abb.com/tacteo
