

MEGADRIVE CASCADE (DCS500)

Current life cycle status

MEGADRIVE CASCADE drives based on DCS500 are in the Obsolete phase since 01.01.2014 according to the ABB life cycle model outlined above.

Life cycle plan

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

In the Obsolete phase the product support for MEGADRIVE CASCADE (DCS500) is not anymore available.

Recommended actions

It is highly recommended to replace the drive by a MEGADRIVE CASCADE (PEC), which is a Classic product.
