Current life cycle status
The MEGADRIVE-LCI (PSR2 light) is in the Limited phase since 01.01.2016 according to the ABB life cycle model outlined above.

Life cycle plan
It is planned to keep MEGADRIVE-LCI (PSR2 light) in the Limited phase until the end of 2020, after which it will be transferred to Obsolete phase.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Recommended actions
It is recommended to upgrade the drive’s control unit to PEC control platform (refer to Control Upgrade service product description). After this Control Upgrade service the drive installation will return to the Classic phase where complete life cycle services will be available (refer to Life cycle Status Statement of MEGADRIVE-LCI (PSR) after Control Upgrade).

Alternatively the drive can be replaced by active MEGADRIVE-LCI.

Further information
For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.

Product availability
Serial production for this drive type has stopped. Instead, MEGADRIVE-LCI (PEC) is available for sale.
