### 3 Faults and fixes

Error	Description	Fix
<p>Access Denied</p> 	<p>As the error suggests, this is an access level issue. More than likely you are not a full administrator on the machine that Datamanager Pro is trying to run on or you do not have administrator rights to the data base location it is using.</p>	<p>Ensure you run the program using the right mouse-click and Run as Administrator option.</p>
<p>Error 6</p> 	<p>More than likely you are not a full administrator on the machine that Datamanager Pro is trying to run on or you do not have administrator rights to the database location it is using.</p>	<p>Ensure you run the program using the right mouse-click and Run as Administrator option.</p>
<p>Access to the path '\\common.mdb' is denied</p> 	<p>Datamanager Pro is unable to access the common.mdb database.</p>	<p>Upgrade to the latest version of the software (version 1.5.1 or later)</p>
<p>Error displayed: 'The PC operating system is not supported by this application'</p>	<p>Datamanager Pro versions 1.5.0 and above are not compatible with PC operating systems earlier than Windows 7®.</p>	<p>Ensure that the PC upon which you wish to run Datamanager Pro has an operating system of Windows 7 or later.</p>
<p>FTS Transfer fails</p>	<p>The Transfer of data files using the FTS Pro functionality has failed.</p>	<p>Reasons for failure to transfer / import files using FTSPPro are recorded in the FTSPPro logs.</p> <p>Early versions of Datamanager Pro also have problems transferring some German characters. If your instrument is in German language, upgrade to the latest version.</p>
<p>Access is denied to the 'structure.mdb' file</p>	<p>The program is unable to access the database file because it does not have the necessary access rights under the account in which you are trying to run the programme.</p>	<p>Ensure that your account has the correct administrator rights. Select within your account settings to run the program as a service.</p> <p>Ensure that you are running the program as an administrator.</p>
<p>Cannot open database</p>	<p>The program does not allow you to open the database and view your data.</p>	<p><b>Method 1:</b>            Reregister the Dao360.dll and the Msrd3x40.dll files:  <b>1.</b> Click Start and click Run.  <b>2.</b> Type regsvr32 followed by the path to your .DAO file. Enclose this path in quotation marks.            For example, to register the DAO 3.6 library, use the following command: regsvr32 "C:\Program Files\Common Files\Microsoft Shared\DAO\DAO360.DLL"            If the Dao360.dll file is successfully registered, a message similar to the following is displayed:           DllRegisterServer in C:\Program Files\Common Files\Microsoft Shared\DAO\Dao360.dll succeeded.  <b>3.</b> Repeat step 2 to register the Msrd3x40.dll file using the following command: regsvr32 "c:\WINDOWS\system32\msrd3x40.dll"</p>
<p>Another entry with the key already exists</p>	<p>Displayed error when trying to import and display data.</p>	<p>Upgrade Datamanager Pro software to the latest version. If the problem persists, contact your local ABB representative.</p>
<p>Registration ID does not match that given on license documentation therefore license key is not valid</p>	<p>After entering the information on the license documentation the registration ID does not match that shown and therefore the license key is invalid.</p>	<p>The name and organization entered in the software must match that given in the license document exactly.</p> <p>The registration ID is fixed and if they do not match the license key provided will not work. Follow the instructions provided on the document.</p>
