Vacuum cast coil dry type transformers
Reliable solutions for all applications

A large variety of applications demand this technology which contributes to high safety performance, cost savings and environmental respect.

ABB is the global leader in power technologies providing the broadest experience in all applications, ranges and customized projects:

- wind
- solar
- marine
- railways
- drives
- power plants
- utilities
- buildings
- chemical and pharmaceutical
- metal and mining
- pulp and paper
- oil and gas
- cement
- water
- industry
- infrastructure
