Enabling sustainable mining growth

PowerStore™

Minimize OPEX with affordable, reliable and high-quality power

PowerStore™ is a reliable containerized plug-and-play microgrid solution, well suited to meet the intensive energy demands of the mining industry. As the heartbeat of any microgrid, PowerStore can act as the “Virtual Generator” to form the grid, integrating up to 100% of renewable energy. Enabling mines to cut-down diesel consumption and minimize OPEX with affordable, reliable and high-quality power. abb.com/microgrids
