ScreenMaster Videographic Recorder Training Advanced Z1611

The skills of operations and maintenance personnel play a key role in equipment performance as well as maximizing return on investment.

ABB Measurement Products' training facilities at the Stonehouse site deliver a programme of Instrumentation and Analyser training courses, specifically designed to meet client's needs.

ScreenMaster Videographic Recorder Training

The course is designed to provide operators and engineers with the knowledge and skills necessary to utilise the wide range of data display and storage facilities provided by the range of ScreenMaster recorders.

Students will gain an understanding of the recorder hardware/software operation, HMI communications and data transfer/storage. On completion of the training, students will have a full understanding of ABB's DataManager archiving software.

Agenda Day 1: 09.30 – 16.00	
Registration & coffee	09.30 – 10.00
Introduction	Welcome
Product overview	MS500 – MS3000
Recorder hardware	Inputs & outputs
Lunch	12.00 – 13.00
Hardware	Communications
Software operation	Programming
Course review	15.30 – 16.00

Agenda Day 2: 09.00 – 15.00	
Coffee	09.30 – 10.00
HMI Interface	Data access via FTP (File Transfer Protocol)
HMI Interface	Data access via FTP (File Transfer Protocol)
