Release Notes

Release 4.0.1 Build 0073

General Information

- This update will replace the plate PDC Preview and PDC E power of the e-Design suite. It will be also the base the for product range of pro E power. These additional parts will be installed automatically for countries, where the system is launched and/or to special user groups. Further information will follow in separate mails for the involved users.
- PDC 4.0.1 doesn't need admin rights any more during runtime for new installations. Update installation still need admin rights. In case you like to change the admin rights, you have to uninstall PDC and reinstall the new release V 4.0.1

What's New

- TwinLine S43 and CombiLine S product range integrated
- Complete device range updated
- Data and Drawing export available
- Symbol generator integrated
- Wiring diagram integrated
- Administration rights are not mandatory anymore during runtime (only for new installations)

Fixed Bugs

- Minor bugs in all areas fixed.
