NOTES:
1. All installations in hazardous locations must comply with requirements of certification drawing 2015246-CD.

RS-232 Comm Term Bd
P/N 2101059-002
or
P/N 2100888-002

DO1 provides GND path, when activated
VBATT provides Voltage to Device

Third Party Solenoid/Sampler

This diode is required, when NOT included in Solenoid/Sampler (Sampler does not provide protection from inductive kickback). Diode should be placed as close to the solenoid as possible.

(Recommended diode: 1N5818)
