

## Technical Release Note

### Technical Description

DriveMS software package is released from date 29.11.2002.

DriveMS allows serial communication between PC and very good drives like SAMI STAR, SAMI MEGASTAR and SELE-type DC drives. DriveMS is replacing the old DOS software DMS.

### Content of delivery

The content of delivery is a CD. Most of the customers have cabling HW ready. The HW is also available as spare part. There are two versions:

- DriveMS with point-to-point principle code: 3AFE64684884
- DriveMS for multiple simultaneous drives attached code: 3AFE64690795

User's Manual in English is available in the Lotus Notes Document Directory and is delivered as well in CD-ROM.

### Features of DriveMS1.0

- Windows NT, Windows 2000 and Windows XP compatibility.
- Supports Vector and Scalar control, LGU, SELE, MEGASTAR. Totally over 20 SW versions supported.
- Multiple COM ports of PC can be used at the same time with multiple version
