## Booth highlight – Stand 1130, capitalize hall 1

### Measurement product

The instrumentation equipment actively monitors your plant's temperature, pressure, levels and flow, safely, productively and profitably.

### Lighting & conduit systems

ABB provides a comprehensive offer of lighting fixtures, control stations, junction boxes, custom-built control panels, conduit systems and cable glands for use in harsh environments, meeting the strictest worldwide standards.

### Transformer

ABB is a leading global manufacturer of dry-type and liquid-filled transformers specifically designed to meet the requirements of the oil and gas industry.

### A history of ABB innovation

ABB has a long history of innovation, stretching back to the 1880s when its predecessor companies, ASEA and BBC, were founded.

### Discover ABB offerings to the oil and gas industry

Discover ABB's innovation, renewable and energy efficiency solutions for oil, gas and chemicals industry. Explore all of ABB's offering to the oil and gas industry via the interactive presentation.

### Extended Operation Workplace

The EOW is a space-saving solution for your operator workplace, with built-in ergonomics and integrated light and sound.

### Gas compression module

CM800 gas compression modules are design for oil, gas and chemicals industry, It meets the most stringent requirements of dealing with different gas types includes wet gas, sour and acid gasses. The modules can work in both outdoor and indoor conditions.

### Chemical solution

ABB provides the systems, solutions and services needed to operate downstream refining and petrochemical plants safely, productively and profitably.

### Wireless communication network

Wireless oil and gas communication networks deliver broadband speeds and form a scalable foundation to securely support multiple applications that increase operational efficiency and safety on one cost-effective physical infrastructure.

### Daily presentation

Join us for the technical presentations describing the latest technology.

### Medium-voltage products

Medium-voltage products are designed for heavy duty industrial applications and extensively tested to withstand the requirements of the oil, gas and petrochemicals industry helping ensure maximum safety, reliability and uptime.

### Smart sensors

Learn about a new technology that transforms simple low voltage motors into intelligent machines that alert users when they need servicing.
