

ABB improves the efficiency of the mining industry

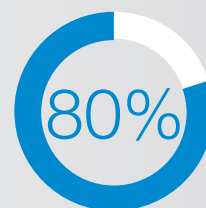

ABB provides the PSTX soft starter to the equipment manufacturer Xylem, in South Africa

With ABB's soft starters Xylem can make panels for industrial applications that pump water out of mines as deep as 3,500 m

Using the PSTX soft starters from ABB, Xylem estimates that the...

...need for extra components has been reduced by

...size of panels has been reduced by half

...panel building time has been reduced to 1/3 of the original time

Thanks to this, the total cost per panel has been reduced by 50%
