Status on EU directive RoHS (restriction of the use of certain hazardous substances)

Dear Customer,

The European directive about RoHS involved a lot of questions. Here is further information regarding the application of the directive for twilight switches with time switches.

What about the RoHS rules for the DTS7/1-TWS and DTS7/2-TWS?

The DTS7/1-TWS and DTS7/2-TWS are not in the product list covered by the RoHS Directive. But in some case they may be components of concerned equipments. Consequently customers may demand that the a.m. products will be made RoHS compliant.

Nevertheless that the DTS7/1-TWS and DTS7/2-TWS might be made RoHS compliant, the responsibility for the concerned equipment remains with the manufacturer of it.

What is the time schedule?

The delivery of the above listed items, in line with the RoHS Directive, will vary according to the inventory levels of the raw materials or components.

The plan is to be ready before end of the 31st December 2007.

The identification references / order code will not change. Information will be available when the RoHS compliance is achieved.

However, this letter does not constitute a binding commitment.

With best regards,

Quality Manager
Valter Patruno
